

NE 192nd Street Culvert Replacement Project

Prior conditions

During construction

After completion

Project Status

Construction was completed in Fall 2017.

Project Description

- Remove existing culvert and replace it with a new fish-passable box culvert;
- Relocate existing utilities and raise road elevation slightly as needed for utilities clearances;
- Restore disturbed riparian plantings.

Purpose

- Add culvert capacity to eliminate flooding caused by Little Swamp Creek at NE 192nd Street;
- Remove fish barrier;
- Reduce erosion at culvert outlet.

Funding

Originally budgeted as high-flow bypass with Surface Water funds. The City has secured additional King County Flood Control District grant funding to complete the design and construction of the required fish-passable culvert.
