

# TRANSPORTATION ELEMENT

## INTRODUCTION

Since its incorporation in 1998, the City of Kenmore has continuously made investments that enhance its position as a vibrant community in which to live, work, and play. New civic facilities in downtown and multimodal transportation facilities throughout the City have been key contributors to the City's vitality. Building on previous improvements, this Transportation Element aims to support the vision of Kenmore as a high-capacity transit community with an activated, thriving downtown, as described in the Land Use Element. It also describes a network that supports travel by walking, biking, and riding transit throughout Kenmore, in addition to supporting adequate mobility when traveling by car in Kenmore through 2044. The Element supports the City's Diversity, Equity, and Inclusion Policy, adopted in 2020, to allocate resources in areas with historically disadvantaged communities. Recognizing that vehicle emissions are Washington State's largest contributor to greenhouse gases, the Element reflects the goals and policies described in Kenmore's Climate Action Plan (CAP), emphasizing a shift to transportation modes and technologies that reduced vehicle emissions.

### Purpose

The purpose of the Transportation Element is to describe the City's vision for a safe, balanced, and efficient multi-modal transportation system that supports the Land Use element. The Transportation Element includes goals, policies, and objectives for maintenance and development of Kenmore's transportation system. It also identifies future transportation investments needed to realize the city's vision for multi-modal mobility within Kenmore. The Transportation Element informs the development of the Capital Improvement Program (CIP) by identifying the types of projects the City should undertake to support future transportation needs in the 6- and 20-year horizons. The plan also evaluates how these projects coincide with the City's financial resources.

This Transportation Element includes the following sections:

- **Existing Conditions:** Describes conditions for all travel modes in the existing transportation system. This section also identifies current challenges and trends that will affect Kenmore's transportation network in the future.
- **Goals, Objectives, and Policies:** Explains Kenmore's vision for transportation and the goals that serve as the basis for the Transportation Element.
- **Future Transportation System:** Describes the City's layered transportation network concept to create a complete, multimodal transportation network in Kenmore. This section also establishes the City's level of service (LOS) standards.
- **Near Term and Long Term Capital Projects:** Provides near-term and long-range project lists based on the community values expressed in the transportation goals and layered network.

- 1       • **Implementation Strategies:** Evaluates Kenmore’s financial conditions over the next  
2       20 years and provides guidance on plan implementation.  
3  
4

### 5 **Regional Context**

6 The Transportation Element sets a framework for understanding, prioritizing, measuring,  
7 and creating a transportation network to help Kenmore achieve its land use vision.  
8 Kenmore’s regional setting, shown in **Figure T-1**, is important. Nestled on the north shore  
9 of Lake Washington, the City forms the northern edge of King County and is bisected by  
10 State Route 522 (SR 522), a Highway of Statewide Significance. Given this strategic  
11 location, transportation conditions in the City are strongly influenced by pass-through  
12 traffic travelling between Seattle and east side cities, as well as growth in Snohomish  
13 County. The Kenmore Air Harbor provides connections to additional regional  
14 destinations, such as the Olympic Peninsula, the San Juan Islands, and British Columbia.  
15 The City must coordinate its transportation planning with a variety of jurisdictions,  
16 including neighboring cities, King County (including King County Metro), Sound Transit,  
17 the Puget Sound Regional Council (PSRC), and the Washington State Department of  
18 Transportation (WSDOT).

1 **Figure T-1: City of Kenmore and Surrounding Area**

2

## **Growth Management Act (GMA)**

The State's Growth Management Act (GMA) of 1990 requires communities to prepare a transportation plan consistent with the City's Land Use Element. Specific GMA requirements for the Transportation Element include addressing:

- Land use assumptions used in estimating travel
- Estimated traffic impacts to state-owned transportation facilities resulting from growth
- Future transportation facilities and services needs, including those for air, water, and ground transportation
- LOS standards for arterials, state highways, and transit routes
- Specific actions and requirements for bringing locally owned transportation facilities and services into compliance with established LOS standards
- Forecasts of future traffic based on the adopted land use plan
- State and local system needs to meet current and future demands
- Financing capability to judge needs against probable resources
- A multiyear financing plan based on needs, which will serve as the basis for the City's six-year transportation program
- Strategies to address issues if probable funding falls short of meeting identified needs
- Intergovernmental coordination efforts
- Demand-management strategies
- Bicycle and pedestrian improvements

This Transportation Element addresses the required transportation components of the GMA.

## **VISION 2050**

PSRC is the region's metropolitan planning organization. Comprising cities, towns, counties, ports, tribes, transit agencies, and major employers, PSRC sets regional growth policies for King, Pierce, Snohomish, and Kitsap Counties. Adopted in 2020, VISION 2050, establishes the long term goals for growth management, economic, and transportation issues. This Transportation Element is consistent with the VISION 2050 priorities.

VISION 2050 identifies several key goals for transportation in the region:

- **Maintenance, Management, and Safety** – Maintain, preserve, and operate the existing transportation system in a safe and usable state.

- 1 • **Support the Growth Strategy** – Support the regional growth strategy by focusing  
2 on connecting centers with a highly efficient multimodal transportation network.
- 3 • **Greater Options, Mobility, and Access** – Invest in transportation systems that  
4 offer greater options, mobility, and access in support of the regional growth  
5 strategy.

### 6 **Countywide Planning Policies (CPPs)**

8 The Regional Growth Strategy identifies a network of walkable, compact, and transit-  
9 oriented communities, including the City of Kenmore, that are the focus of urban  
10 development. The Regional Growth Strategy envisions an efficient, multimodal  
11 transportation system that provides various options for moving people and goods into  
12 and among centers.

13 The overarching transportation goal in the Countywide Planning Policies (CPPs) is that  
14 “the region is well served by an integrated, multimodal transportation system that  
15 supports the regional vision for growth, efficiently moves people and goods, and is  
16 environmentally and functionally sustainable over the long term”. The CPPs support the  
17 transportation vision in the Regional Growth Strategy with policies focused on:

- 18 • Supporting Growth – focusing on serving the region with a transportation system  
19 that furthers the Regional Growth Strategy;
- 20 • Mobility – addressing the full range of travel modes necessary to move people  
21 and goods efficiently within the region and beyond; and
- 22 • System Operations – encompassing the design, maintenance, and operation of  
23 the transportation system to provide for safety, efficiency, and sustainability.

### 24 **Other Plans**

26 WSDOT controls SR 522, which runs east-west through Kenmore. As such, the City  
27 coordinates with WSDOT and neighboring communities regarding impacts to and needed  
28 investments on SR 522.

30 Sound Transit provides regional, high capacity transit service throughout the Puget Sound  
31 via Link light rail, Sounder commuter rail, and ST Express bus service. Sound Transit is  
32 currently advancing the capital and service investments included in the ST2 and ST3  
33 ballot measures approved in 2008 and 2016, respectively. The ST2 ballot measure  
34 included funding for the Lynnwood Link light rail extension, planned for completion in  
35 2024. The Shoreline South/148th Street and Shoreline North/185th Street stations will be  
36 the closest light rail stations to Kenmore, providing nearby access for Kenmore residents  
37 wishing to ride transit to destinations throughout the Puget Sound region. Sound Transit’s  
38 Stride bus rapid transit (BRT) service on SR 522 was funded by the ST3 ballot measure.  
39 Planned for implementation in 2026, Stride will provide high-capacity transit service  
40 directly in Kenmore, providing residents with a direct connection to light rail in Shoreline  
41 and Stride service on I-405.

1 Metro Connects is King County Metro’s (Metro’s) 30-year vision for mobility. It is a long-  
2 range service and capital vision that describes planned future service networks and the  
3 capital investments needed to support those networks. The plan envisions multimodal  
4 connections to the places people want to go with safe and secure operations and  
5 facilities for passengers, employees, and communities. Metro Connects emphasizes  
6 Metro’s core values of safety, equity, and sustainability, incorporates the  
7 recommendations of the King County Metro Mobility Framework, and aligns with  
8 Metro’s Strategic Plan for Public Transportation and its Service Guidelines. The service  
9 networks envision changes to Kenmore’s transit services, particularly in relation to the  
10 implementation of Sound Transit’s investments in the regional high capacity transit  
11 (HCT) system.

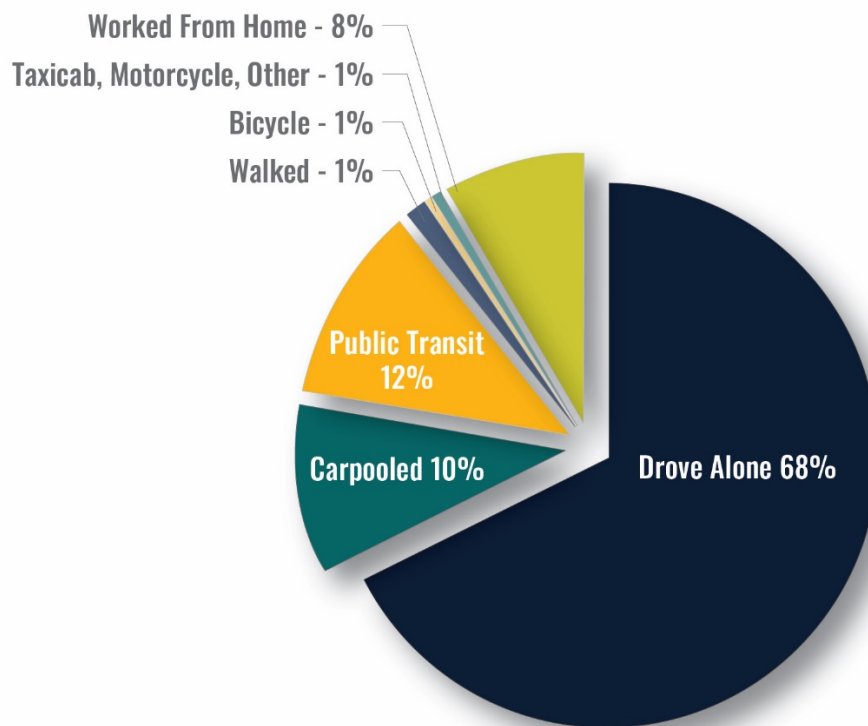

## 1 EXISTING CONDITIONS

### 2 Transportation Network Overview

3 Kenmore's transportation network accommodates many modes of travel, including  
4 walking, bicycling, public transit, driving, and flying. Vehicular travel for commuting to  
5 work, which generally occurs during the morning (AM) and evening (PM) peak when  
6 traffic volumes are highest, is the primary choice for many travelers in and around  
7 Kenmore, as shown in the Census journey-to-work data (see **Figure T-2**). The peak  
8 volumes for vehicles, pedestrians, bicyclists, and transit can occur during different times  
9 by location. For example, areas near schools are influenced by the start and end of  
10 classes, resulting in increased pedestrians and vehicles volumes during these times.

11

### 12 **Figure T-2: Commute Mode to Work**

13

14 Source: American Community Survey 2019 5-Year Journey to Work Data

1 City streets form the backbone of the transportation framework with roadways shaping  
 2 how residents and visitors experience Kenmore. The City of Kenmore currently classifies  
 3 its roadways into major arterials, minor arterials, collectors, and local streets, as shown  
 4 in **Table T-1** and displayed in **Figure T-3**. Examples of each roadway type and the  
 5 intended uses served are described in **Table T-1**.

6

7 **Table T-1. Functional Classification of Roadways**

Roadway Type	Description / Purpose	Example
Major Arterial	A roadway that serves through trips and connects Kenmore with the rest of the area.	<ul style="list-style-type: none"> <li>• Simonds Road NE</li> <li>• 68th Avenue NE (SR 522 to NE 170th Street)</li> </ul>
Minor Arterial	Minor arterial streets provide inter-neighborhood connections and serve both local and through trips.	<ul style="list-style-type: none"> <li>• 61st Avenue NE</li> <li>• NE 181st Street (65th Avenue NE to 73rd Avenue NE)</li> <li>• Juanita Drive NE</li> </ul>
Collectors	Collectors distribute trips between local streets and arterials and serve as transition roadways to or from residential areas.	<ul style="list-style-type: none"> <li>• 68th Avenue NE (north of SR 522)</li> <li>• 73rd Avenue NE</li> <li>• NE 153rd Place</li> </ul>
Local	Local streets provide circulation and access within residential neighborhoods.	<ul style="list-style-type: none"> <li>• 62nd Avenue NE</li> <li>• NE 150th Street</li> </ul>

8

1 **Figure T-3: Roadway Functional Classification**

2

1 There are approximately 45 linear miles of concrete sidewalks and 120 marked  
2 crosswalks in the City, but sidewalks are still absent from many streets. On quiet  
3 residential streets, sidewalks may not be necessary; however, Kenmore has a number of  
4 arterials connecting residents from their homes to commercial areas, employment  
5 centers, schools, and transit stops that lack adequate pedestrian facilities.

6  
7 **Figure T-4** displays different types of existing pedestrian infrastructure in Kenmore.  
8 **Figure T-5** shows where existing sidewalks and trails are located, as well as average  
9 pedestrian volumes (2022) at key intersections during the 2-hour evening peak for  
10 vehicular traffic.

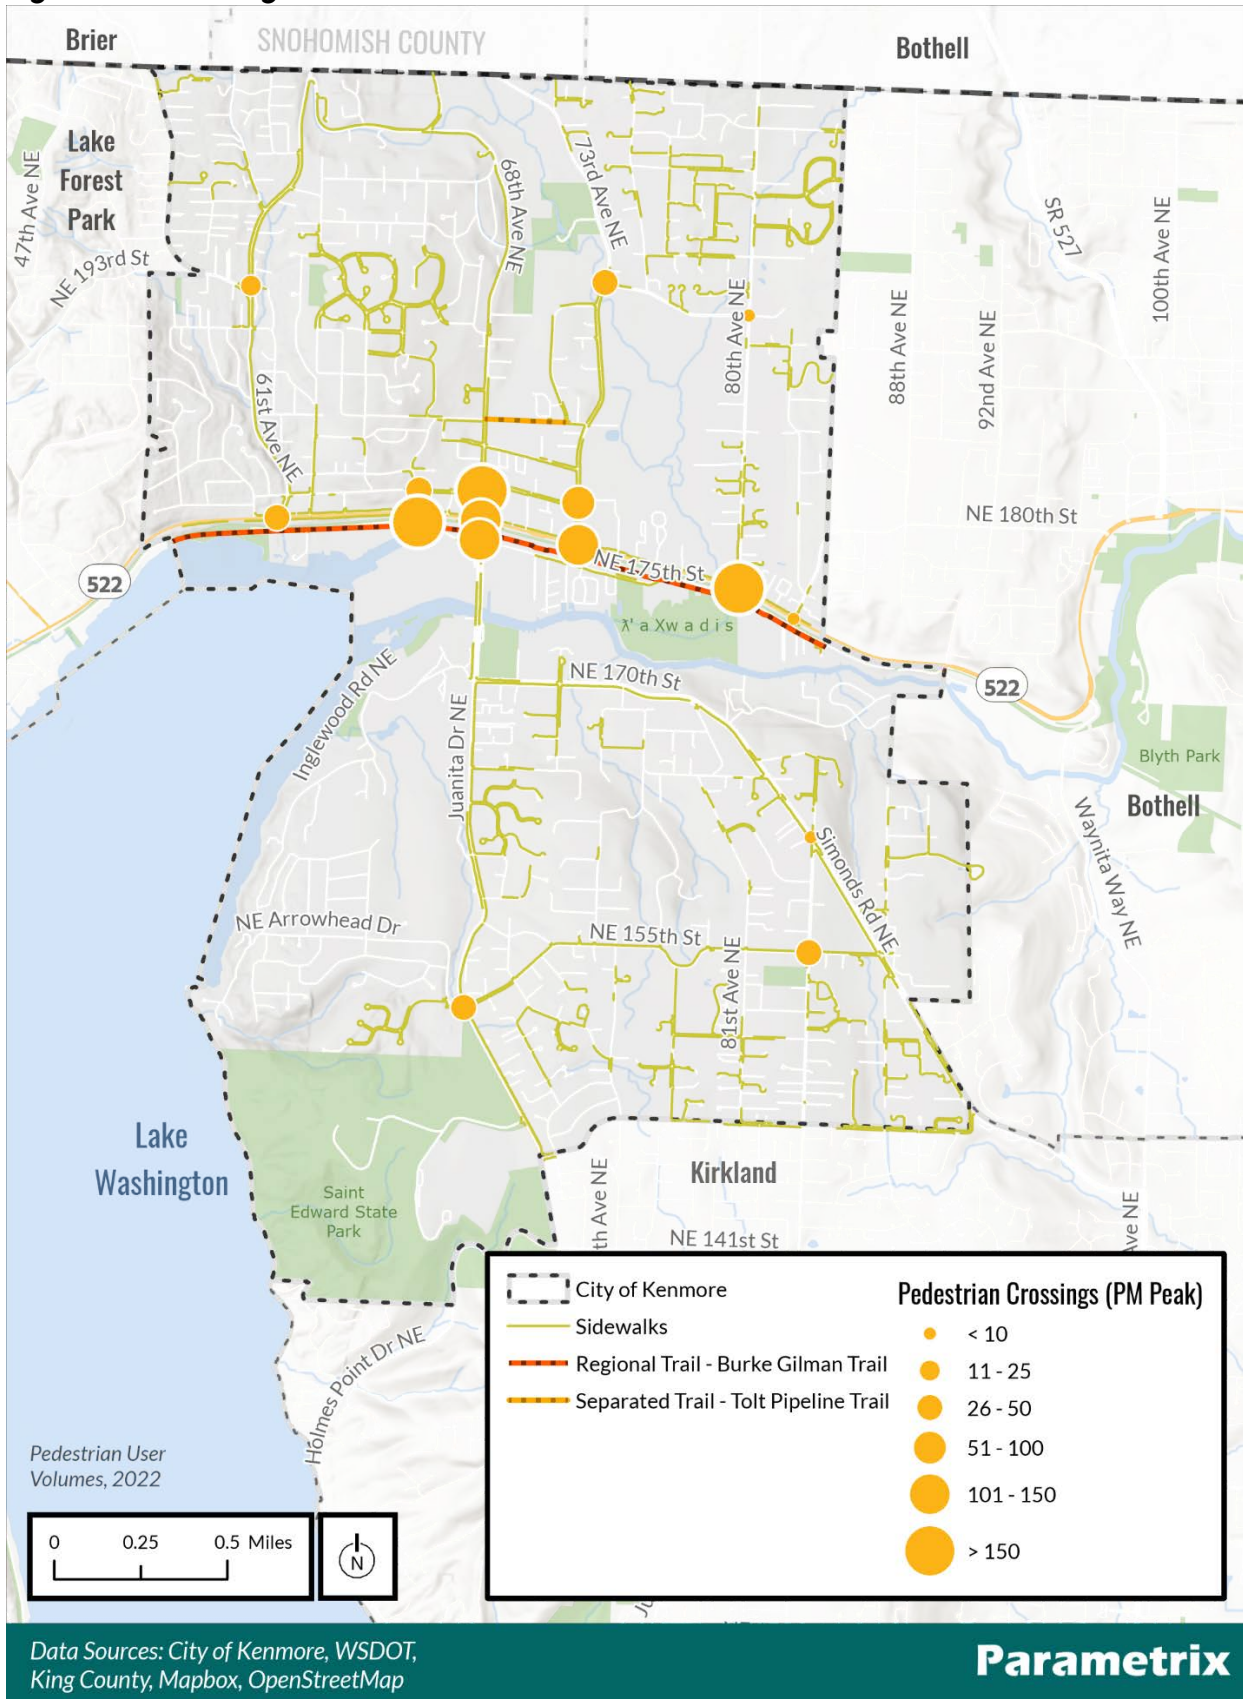

11  
12 **Figure T-4: Existing Sidewalks and Trails**

13  
14 Source: Google Maps, City of Kenmore

1 **Figure T-5: Existing Sidewalks and Trails**

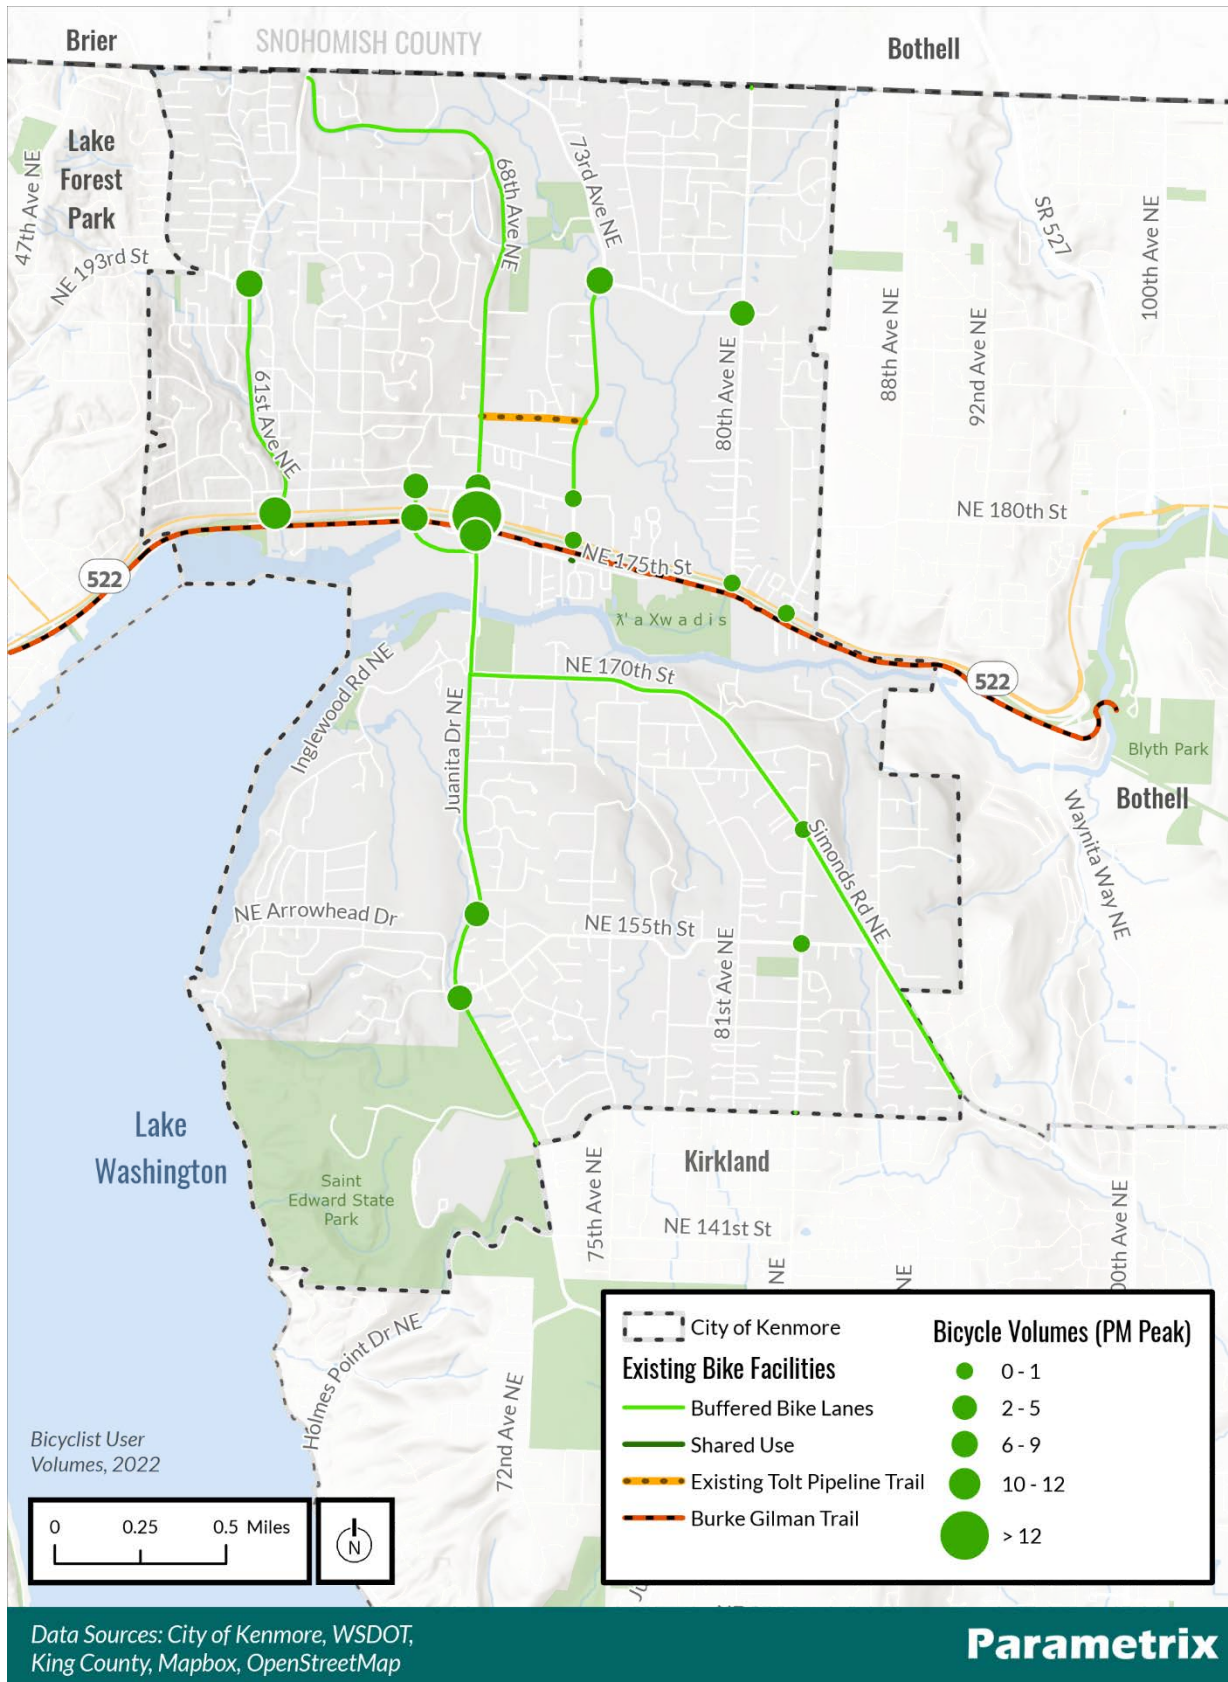

2

1 Kenmore hosts a section of the Burke-Gilman Trail, a regional multi-use trail that connects  
2 residents to Seattle and other area cities. However, for many Kenmore residents,  
3 connecting from home to the Burke-Gilman Trail or other non-motorized facilities can be  
4 challenging due to the topography and curvilinear streets in parts of the city. SR 522 and  
5 68th Avenue NE / Juanita Drive NE create additional barriers to bicycling in Kenmore due  
6 to their high traffic volumes and difficult crossings. **Figure T-6** presents Kenmore’s  
7 existing bicycle facilities, well as average bicyclist volumes (2022) at key intersections  
8 during the 2-hour evening peak for vehicular traffic.

1 **Figure T-6: Existing Bicycle Facilities and Volumes**

2

1 Many Kenmore residents and employees use public transit for trips around and outside  
 2 of the City. Public transit in Kenmore consists of fixed-route and dial-a-ride bus service  
 3 provided by Metro and Sound Transit. Metro also provides on-demand, point-to-point  
 4 transportation between south Kenmore, North Kirkland, and downtown Bothell. The  
 5 Northshore Senior Center also provides door-to-door shuttle service to many of its  
 6 patrons.

7  
 8 **Figure T-7** and **Table T-2** display the Spring 2019 transit routes serving Kenmore, average  
 9 daily boardings at each stop, and park and ride utilization. These volumes reflect a high  
 10 level of bus ridership in the City, particularly on routes that serve SR 522. SR 522 and the  
 11 corridor south of SR 522 currently served by Route 225 (previously served by Routes 234  
 12 and 244) have been designated as high capacity transit lines by PSRC. The Kenmore Park  
 13 and Ride and the park and ride at the Vine Church, both located on SR 522, were 100 and  
 14 96 percent full, respectively, on an average weekday. As shown, there was no service in  
 15 the City north of SR 522/NE 181st Street.

16  
 17 Transit ridership declined dramatically throughout the Puget Sound region during the  
 18 COVID-19 pandemic. Metro and Sound Transit reduced service levels across their  
 19 networks, including the elimination of several routes in Kenmore. Additionally, both  
 20 transit agencies restructured several routes that serve the city in conjunction with the  
 21 opening of the North Link light rail extension in October 2021. Sound Transit Route 522,  
 22 which previously provided service between Woodinville and downtown Seattle, was  
 23 revised to serve the Roosevelt Link station. This change required riders to transfer to light  
 24 rail to continue to downtown Seattle. A new peak only route, Route 320, was created,  
 25 providing service connecting Kenmore to the Northgate Link station, South Lake Union,  
 26 and downtown Seattle. Fall 2021 ridership in Kenmore is summarized in **Table T-2**.

27  
 28 **Table T-2. Bus Service in Kenmore**

Route	Service Type	2019 Average Daily Weekday Spring Boardings	2021 Average Daily Weekday Fall Boardings
225	All Day	N/A	100
234	All Day	249	N/A
243	Peak Only	1	N/A
244	Peak Only	28	N/A
309	Peak Only	110	N/A
312	Peak Only	440	N/A
320	Peak Only	N/A	21
331	All Day	98	72
342	Peak Only	36	8
372	All Day	527	204
522	All Day	680	154
981	DART	1	2

29 Source: King County Metro; Routes 234, 243, 244, 309, and 312 were discontinued in Fall 2021.

1  
2

**Figure T-7: Existing Transit Routes, Facilities, and Boardings (2019)**

3

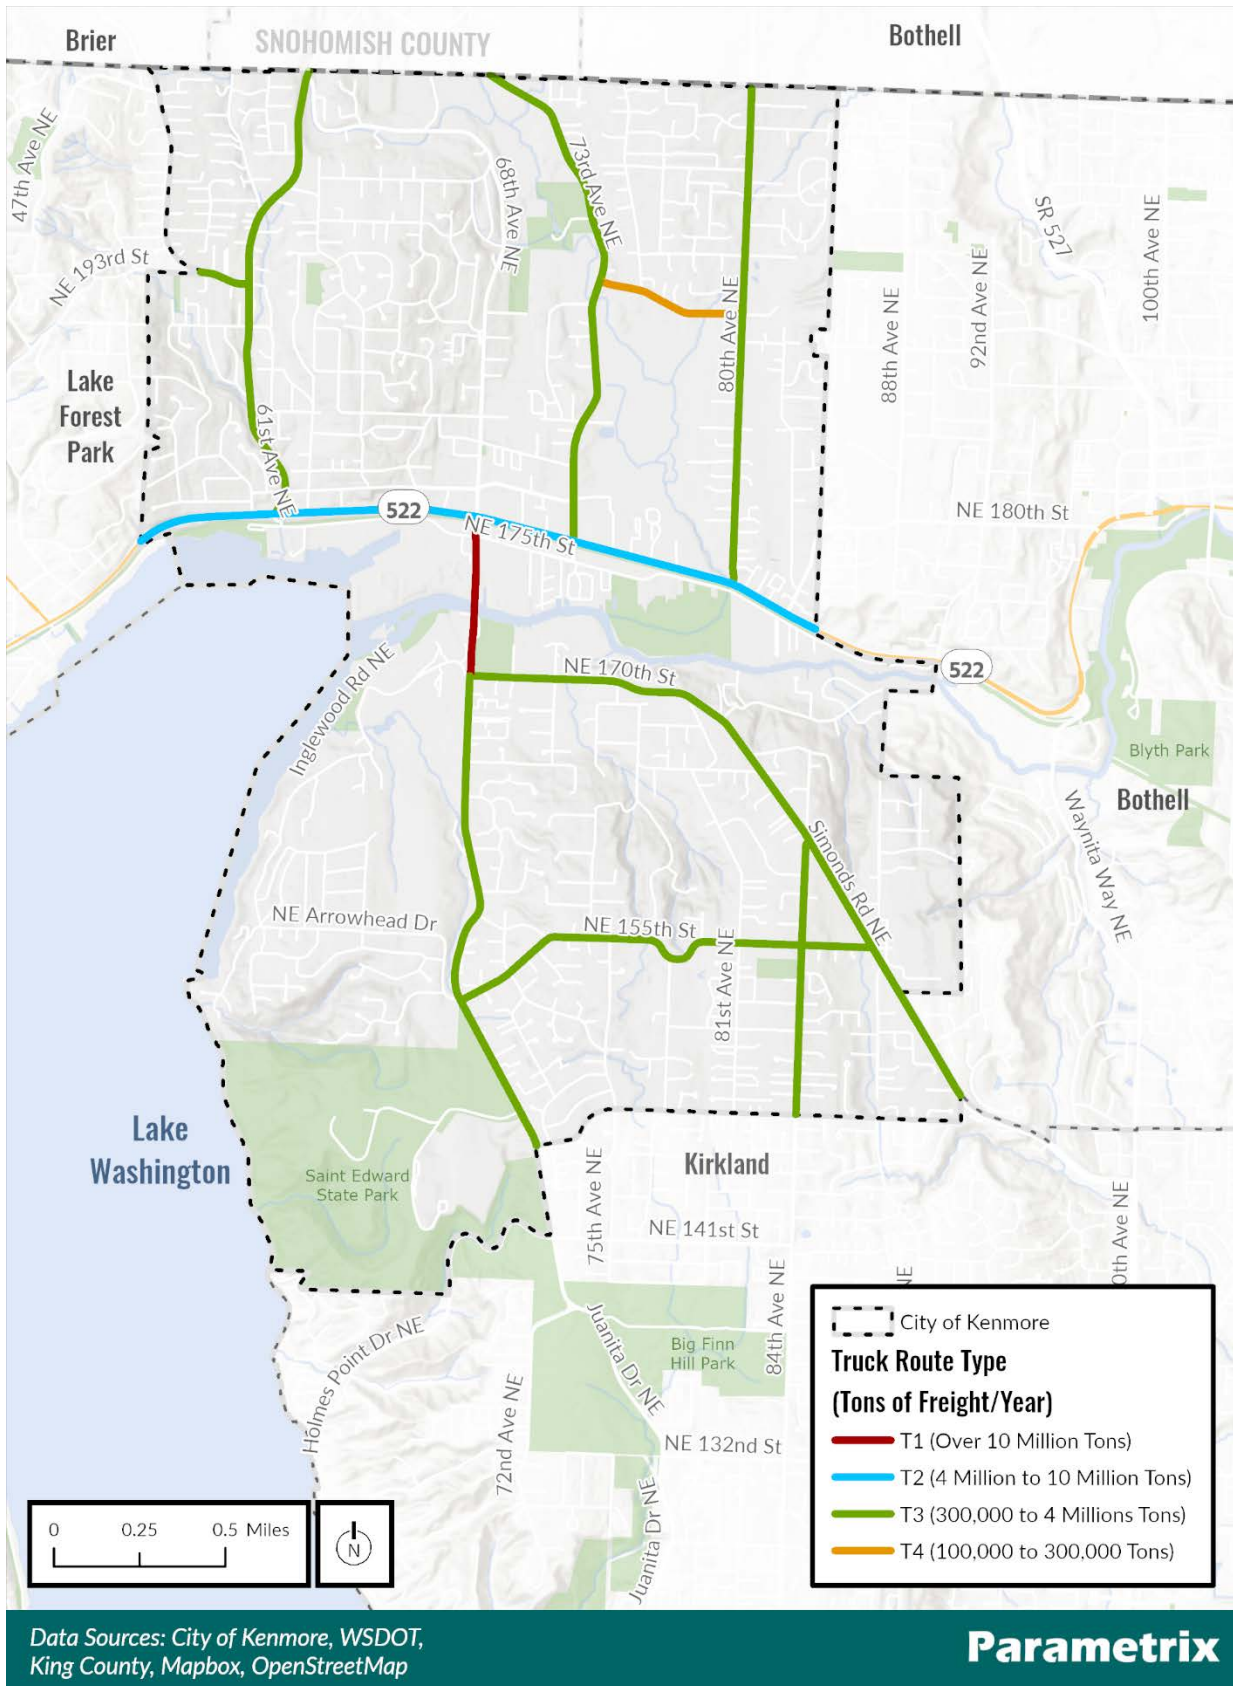

1 Washington State’s Freight and Goods Transportation System (FGTS) classifies the  
2 state’s freight corridors by modes based on annual freight tonnage moved through truck,  
3 rail and waterway freight corridors. Goods movement in Kenmore runs predominantly  
4 along the City’s major arterials of 68th Avenue, NE 170th Street, Simonds Road NE, and  
5 SR 522. Because 68th Avenue provides the only Sammamish River crossing option in  
6 Kenmore, this roadway plays a particularly important role in facilitating commerce. FGTS  
7 classified routes in the City of Kenmore are shown in **Figure T-8**.

8  
9 Beyond these primary routes, delivery vehicles use many other streets to reach their final  
10 destination. For example, although it is not an FGTS classified route (and thus not  
11 displayed on **Figure T-8**), NE 175th Street sees a fair amount of freight traffic due to the  
12 nature of the surrounding land uses it serves. Additionally, a wide array of freight  
13 companies provide deliveries to residents and businesses using all types of roadways,  
14 including local streets.

15  
16 The Kenmore Air Harbor is also a facility of the City’s transportation network. The location  
17 of the Kenmore Air Harbor is displayed on **Figure T-9** and a description of its area, fleet  
18 size, operations, and travel take-off and landing areas on Lake Washington and general  
19 aircraft flight paths used on take-off and landing can be found in the Land Use element.

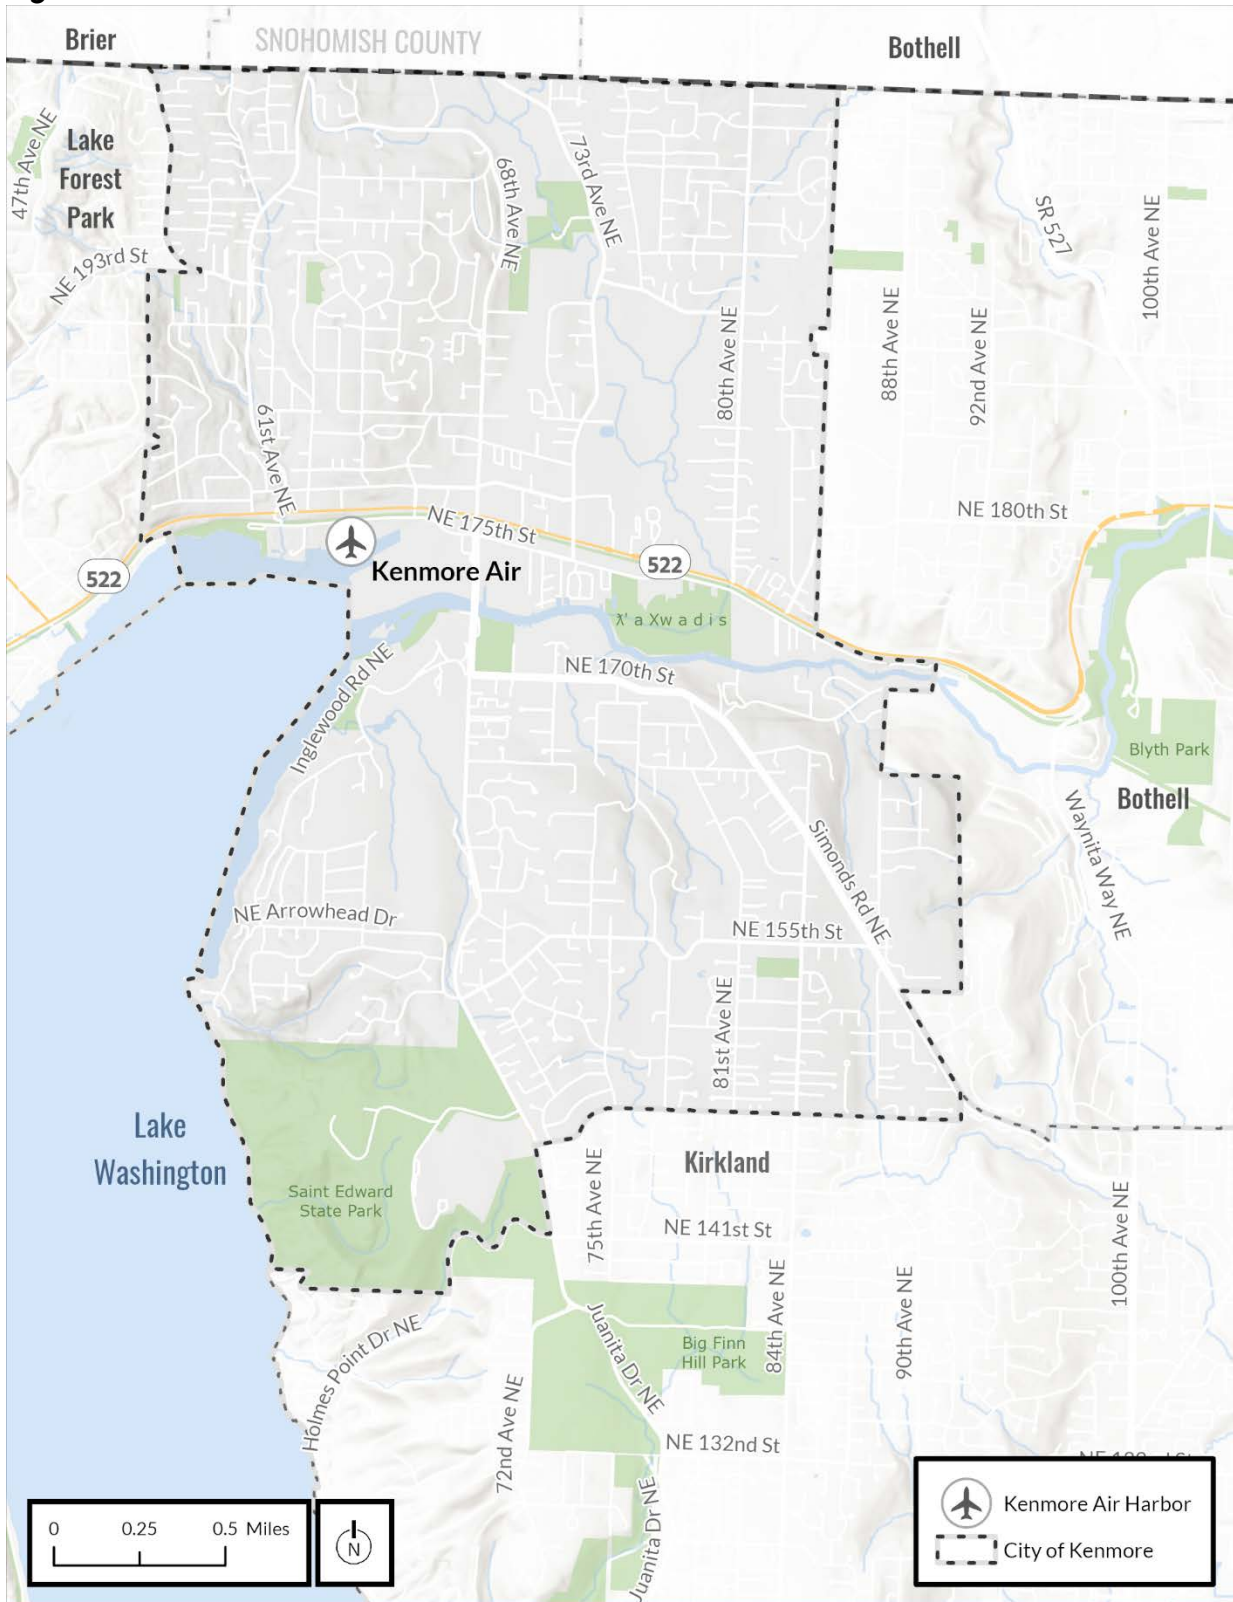

1 **Figure T-8: WSDOT FGTS Classified Truck Routes**

2

1 **Figure T-9: Kenmore Air Harbor**

Data Sources: City of Kenmore, WSDOT, King County, Mapbox, OpenStreetMap

**Parametrix**

2

1 Most Kenmore residents (about 68 percent) choose motor vehicles as their primary mode  
2 of transportation to work. Moreover, many more non-resident travelers pass through the  
3 City on SR 522 / 68th Avenue / Juanita Drive / Simonds Road. Severe congestion during  
4 peak hours illustrates this issue with many intersections experiencing long delays (see  
5 **Figure T-10**).

6  
7 Analysis of Kenmore's congestion for motorists is based on the traffic counts collected  
8 in January 2022. Since March 2020, traffic volumes have decreased in response to  
9 COVID-19 related initiatives. As future traffic volumes are built from forecasting from  
10 baseline conditions, the goal is to model an existing 2022 baseline condition that best  
11 reflects overall trends from the past several years. Overestimating volumes can lead to  
12 future forecasts that may be too high, potentially leading to infrastructure that is overbuilt  
13 for future conditions. Conversely, underestimating baseline conditions could lead to  
14 future forecasts that may be too low, leading to infrastructure that would be potentially  
15 underbuilt for future conditions.

16  
17 To monitor changes in travel volumes related to the COVID-19 pandemic, the City of  
18 Kenmore collected weekly travel data between May 2020 and August 2021. The data  
19 shows as of August 2021, the annual average daily traffic volumes in 2021 were 7 percent  
20 lower than 2019 volumes. Therefore, to be conservative, traffic counts collected in  
21 January 2022 for this analysis were adjusted upward by 7 percent.

22  
23 To understand the level of congestion experienced during the evening commute, 19  
24 intersections were evaluated based on their ability to accommodate PM peak hour  
25 demand in their existing configuration (number of lanes, traffic control, etc.). As noted  
26 previously, the peak volumes for vehicles, pedestrians, bicyclists, and transit can occur  
27 during different times by location. The PM peak period in Kenmore generally ranges  
28 between 3:00 PM and 6:00 PM. The PM peak period for each analyzed intersection is  
29 summarized in **Appendix D-1**. Based on this analysis, intersections were scored into one  
30 of six LOS categories that describe their operations in terms of vehicle delay. **Table T-3**  
31 describes the LOS definitions laid out in the Highway Capacity Manual 6th Edition  
32 (Transportation Research Board, 2016), which is the methodology currently applied to  
33 Kenmore's transportation network.

1 **Table T-3. Level of Service Definitions**

Level of Service	Description	Average Control Delay at (seconds per vehicle)	
		Signalized/Roundabout Intersections	Unsignalized Intersections
<b>A</b>	Free-flowing conditions.	< 10	< 10
<b>B</b>	Stable operating conditions.	> 10 and < 20	> 10 and < 15
<b>C</b>	Stable operating conditions, but individual motorists are affected by the interaction with other motorists.	> 20 and < 35	> 15 and < 25
<b>D</b>	High density of motorists, but stable flow.	> 35 and < 55	> 25 and < 35
<b>E</b>	Near-capacity operations, with speeds reduced to a low but uniform speed.	> 55 and < 80	> 35 and < 50
<b>F</b>	Over capacity, with delays.	> 80	> 50

2

3 The City's LOS policy sets the following standards for its roadways:

4

- Major Arterials – LOS E or better

5

- Minor Arterials and collectors – LOS D or better

6

- Local roads – LOS C or better

7

- Roadways in Kenmore Countywide Growth Center

8

- Signalized intersections shall operate at LOS F or better and not exceed 100 seconds of average total vehicle delay of all movements

9

10

- Unsignalized intersections shall operate at LOS F or better on the minor street approach until a signal warrant is met using the current version of the Manual for Uniform Traffic Control Devices

11

12

13

14

It should be noted that as a highway of statewide significance, SR 522 is exempted from the City's LOS standards.

15

16

17

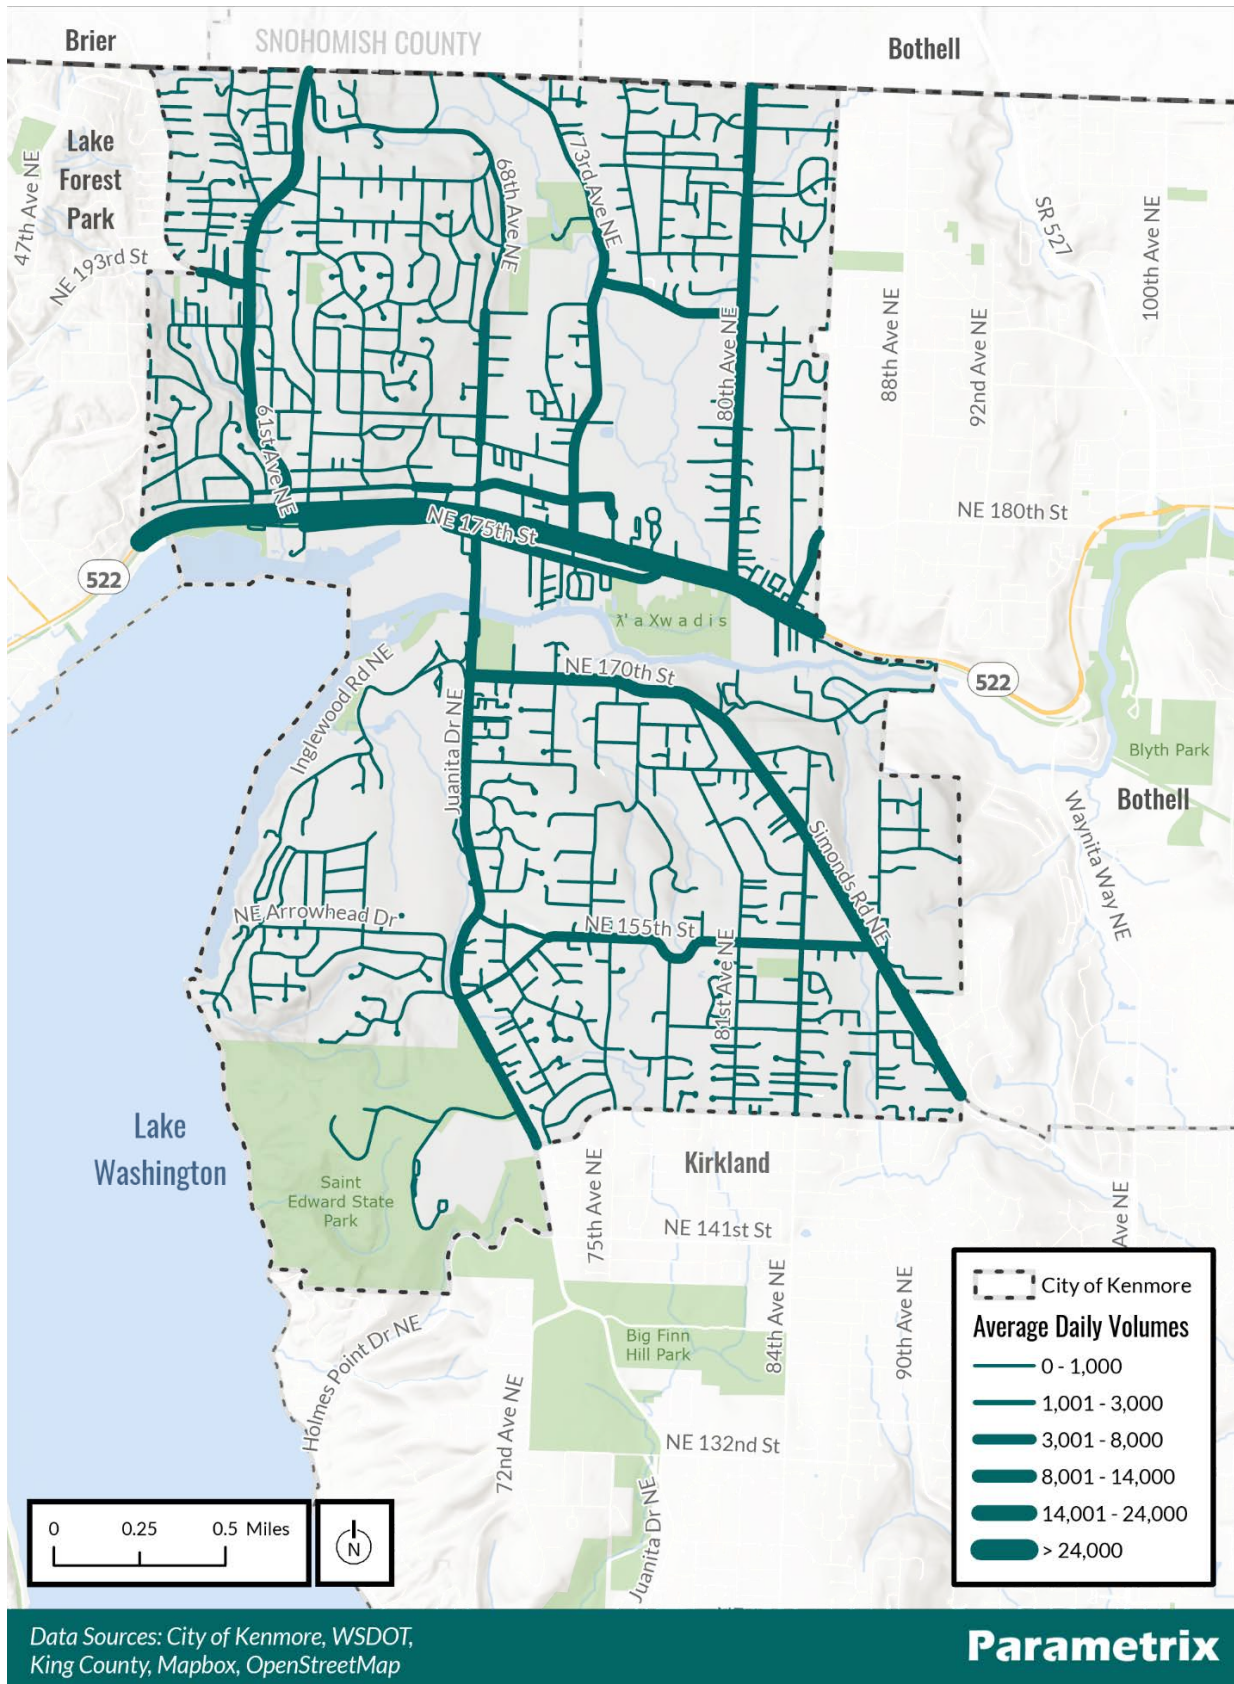

**Figure T-10** shows weekday traffic volumes and **Figure T-11** shows the calculated LOS at each of the 19 intersections. As the figures show, Kenmore's major arterials see high traffic volumes and lower levels of service. Detailed reports of LOS are available in **Appendix D-1**.

18

19

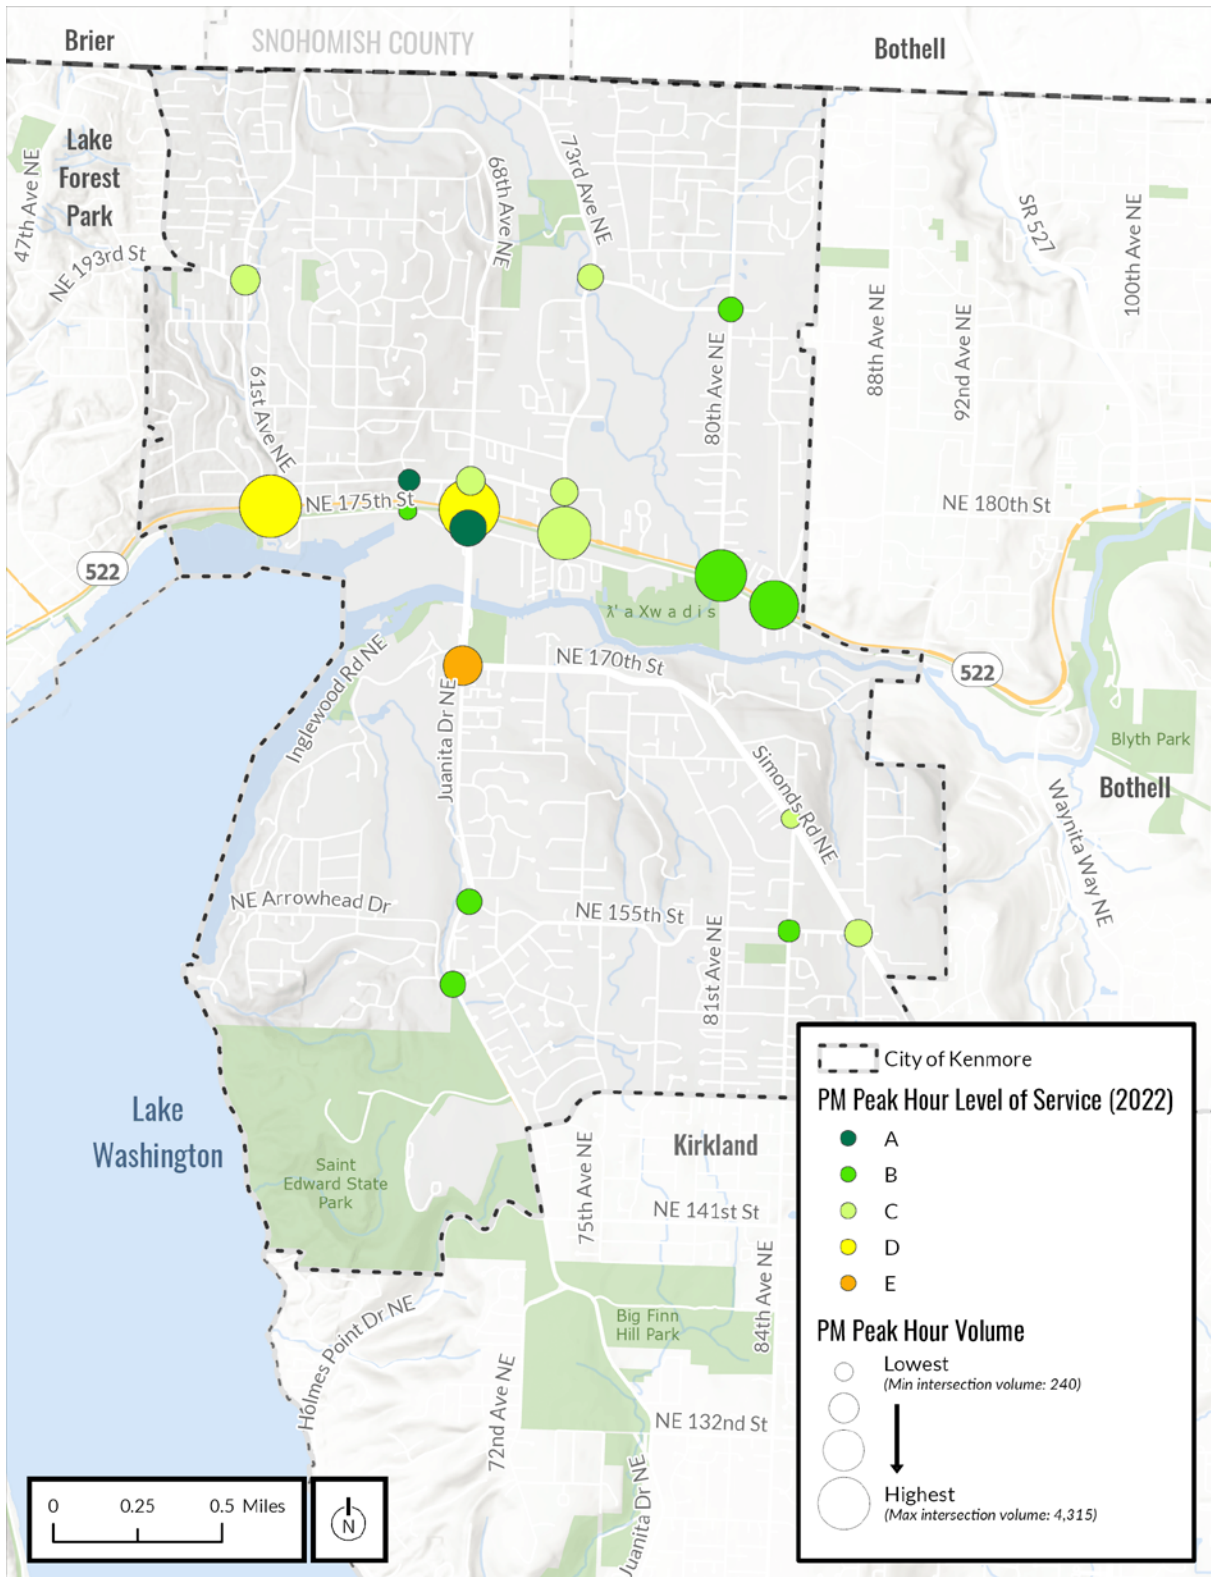

20

1 **Figure T-10: Auto Average Daily Volumes**

2

1 **Figure T-91: Auto Level of Service and Volumes**

Data Sources: City of Kenmore, WSDOT, King County, Mapbox, OpenStreetMap

**Parametrix**

2

## 1 **Current Challenges and Observations**

2 The City of Kenmore has several important challenges to face as it prepares for future  
3 growth and the development of its downtown core. Although Kenmore continues to invest  
4 in its multimodal transportation system, motor vehicle travel dominates the City's  
5 transportation framework currently and many travelers view Kenmore as a "pass-through  
6 town." Kenmore is planning to be a walkable, bikeable, high-capacity transit community  
7 with a vibrant downtown and addressing the following transportation challenges will be  
8 a key to the City's success:

- 9 • Safety and comfort, especially for pedestrians and bicyclists
- 10 • Transit availability and access to high capacity transit
- 11 • Limited connectivity for all users

## 12 **Bicycle and Pedestrian Safety**

13 Since 2017, Kenmore has experienced nearly 175 traffic collisions per year. Of the 871  
14 collisions in Kenmore from January 2017 to August 2021, 325 occurred on SR 522 and  
15 207 occurred on the 68th Avenue / Juanita Drive corridor – 61 percent of the total city-  
16 wide.  
17

18 Highlighting this issue, the period from Winter 2017 through Summer 2021 saw 41  
19 crashes that involved vehicles hitting pedestrians and bicyclists, including one pedestrian  
20 fatality. **Figure T-12** displays traffic crashes for all modes within the City, **Figure T-13**  
21 shows injury severity and **Figure T-14** shows crashes involving bicycles and pedestrians  
22 over a five-year period spanning 2017-2021.  
23

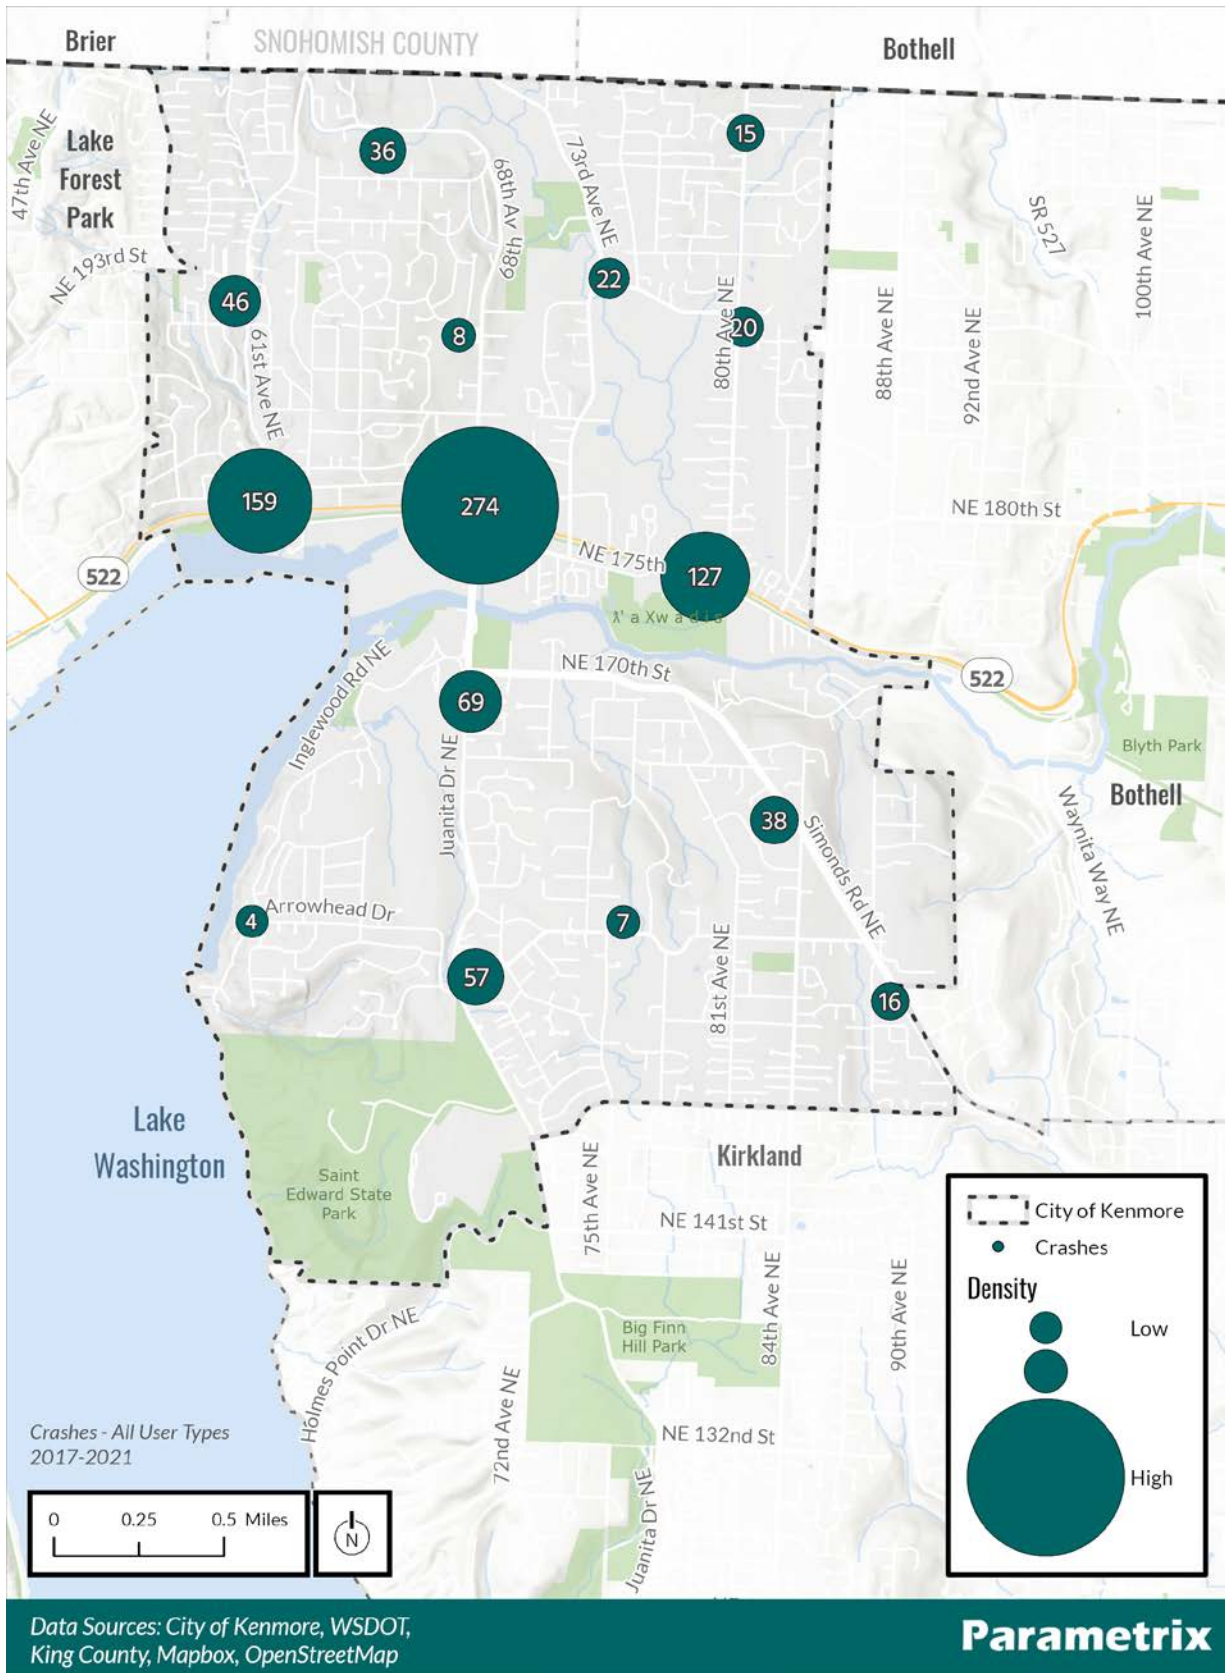

24 Crash severity is categorized by WSDOT into the following five categories:  
25

- 26 • Fatal Injury: Any injury that results in death within 30 days after the motor vehicle  
27 crash in which the injury occurred.
- 28 • Suspected Serious Injury: Any injury other than fatal which results in one or more  
29 of the following: Severe laceration resulting in exposure of underlying  
30 tissues/muscle/organs or resulting in significant loss of blood; broken or distorted  
31 extremity (arm or leg); crush injuries; suspected skull, chest or abdominal injury  
32 other than bruises or minor lacerations; significant burns (second and third degree  
33 burns over 10 percent or more of the body); or unconsciousness when taken from  
34 the crash scene.
- 35 • Suspected Minor Injury: Any injury that is evident at the scene of the crash, other  
36 than fatal or serious injuries. Examples include lump on the head, abrasions,  
37 bruises, minor lacerations (cuts on the skin surface with minimal bleeding and no  
38 exposure of deeper tissue/muscle).
- 39 • Possible Injury: Any injury reported or claimed which is not a fatal injury, suspected  
40 by the person or are indicated by his/her behavior, but no wounds or injuries are  
41 readily evident.

Comprehensive Plan

- 1
  - 2
  - 3
- No Apparent Injury: Situation where there is no reason to believe that the person received any bodily harm from the motor vehicle crash. There is no physical evidence of injury and the person does not report any change in normal function.

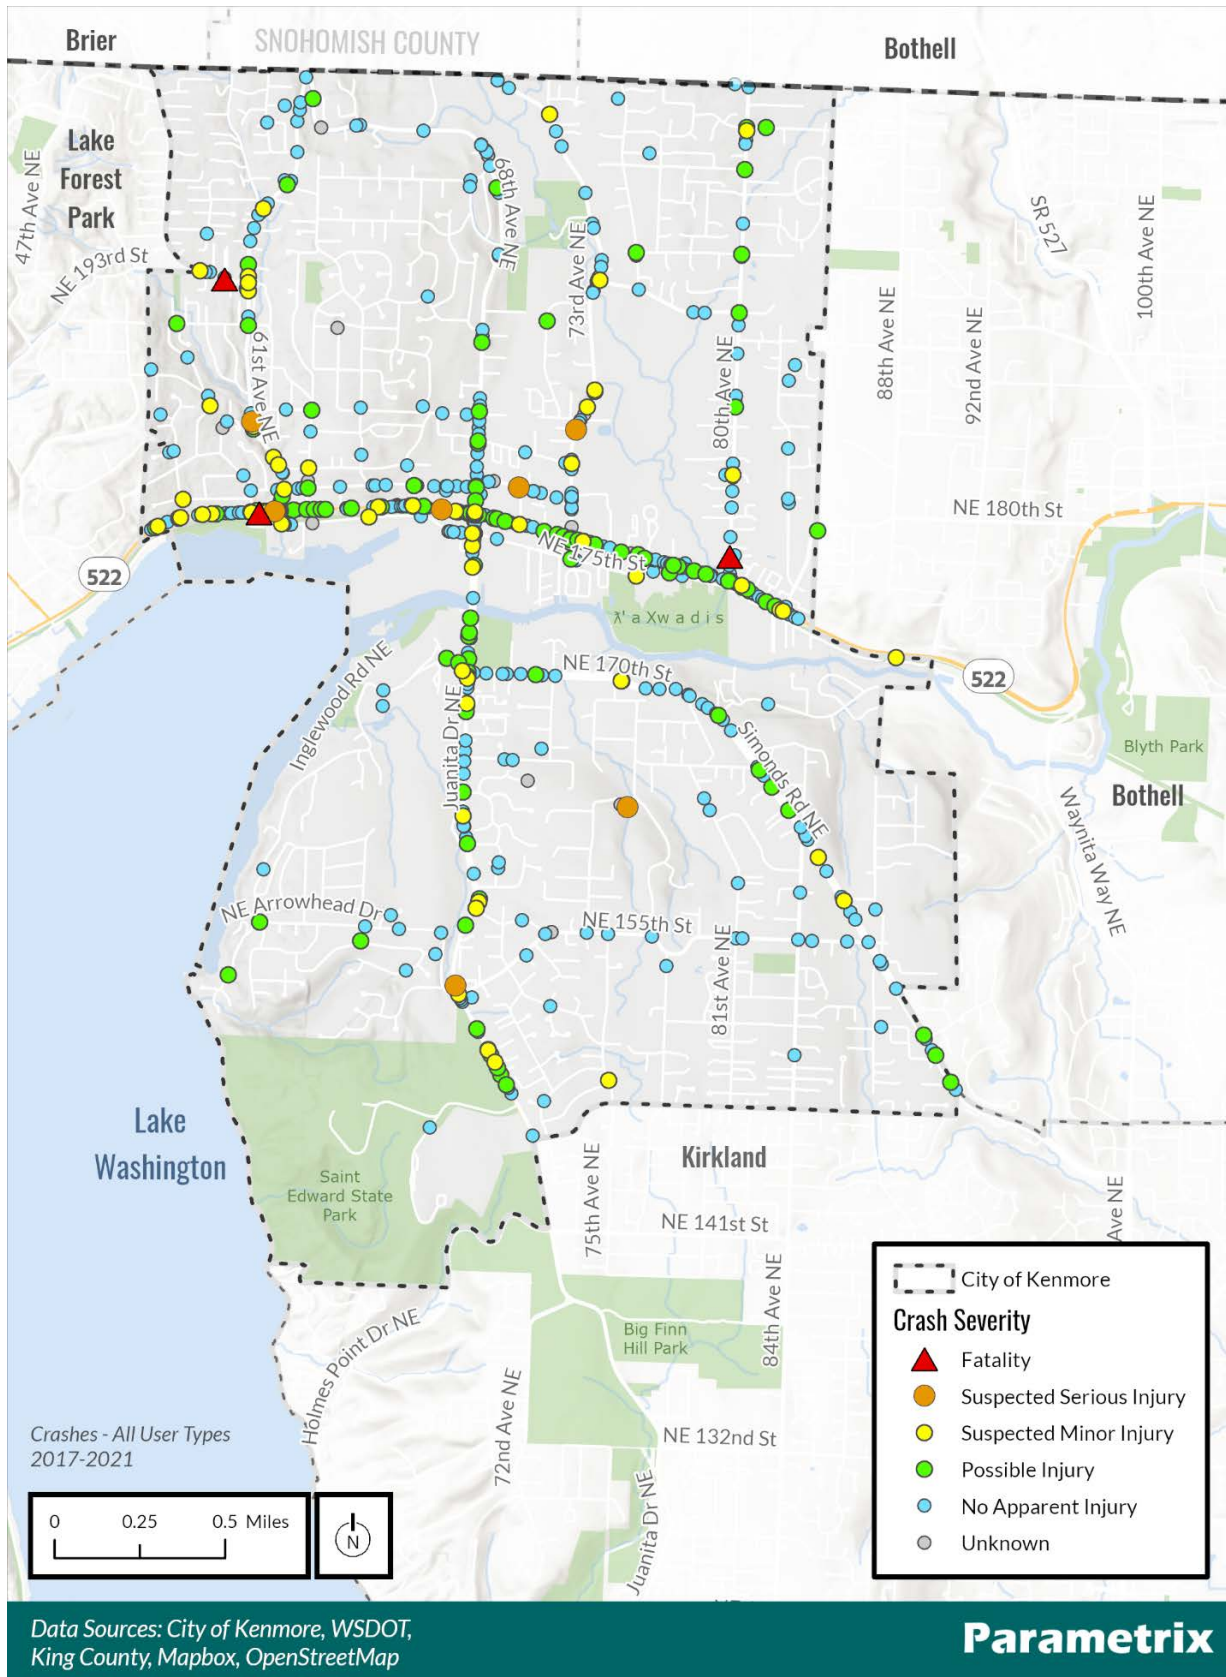

1 **Figure T-12: Crash Density**

2

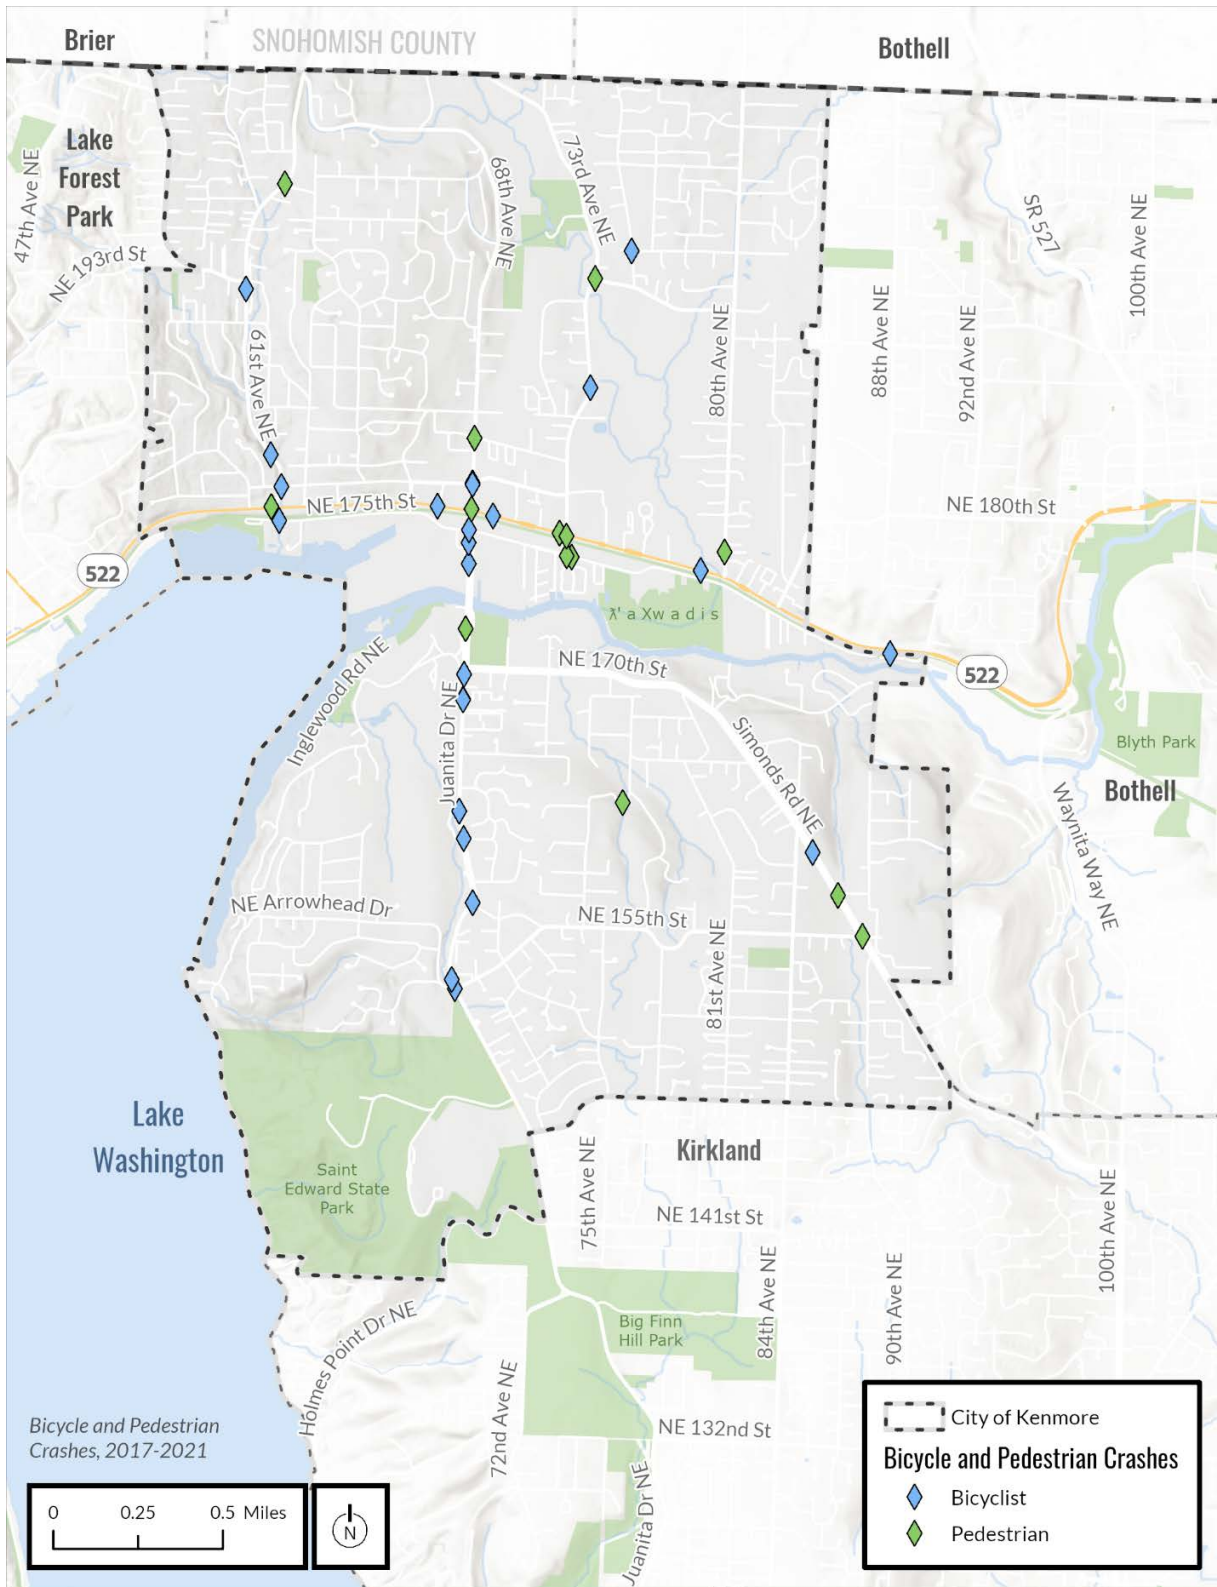

1 **Figure T-13: Crash Severity**

2

1 **Figure T-14: Crashes Involving Bicycles and Pedestrians**

Data Sources: City of Kenmore, WSDOT, King County, Mapbox, OpenStreetMap

**Parametrix**

2

1 The City of Kenmore's Target Zero Initiative was adopted in April of 2014. The goal of this  
2 program is to achieve zero pedestrian and bicyclist fatalities and serious injuries in  
3 Kenmore by 2025 by increasing awareness of pedestrian, bicyclist, and driver safety  
4 issues. The City works toward its Target Zero goal by engaging the Three E's: Engineering,  
5 Enforcement, and Education. These efforts include creating safer pedestrian and bicycle  
6 pathways, offering helmets at a low price, educating bicyclists, pedestrians, and drivers  
7 through events and pamphlets, offering safety vests annually at no charge (while supplies  
8 last), and enforcing traffic safety laws for all road users - among many other citywide  
9 improvements.

10  
11 Kenmore has made many pedestrian improvements in recent years as the City strives for  
12 a more walkable/bikeable city. Sidewalk and crosswalk improvements along SR 522 have  
13 created a better environment for pedestrians moving around the City's commercial areas  
14 and connecting with public transit services or the Burke Gilman Trail. There are seven  
15 pedestrian actuated crossings that are also Americans with Disabilities Act (ADA)  
16 compliant. Four are located near SR 522 and 61st Avenue NE and three are located near  
17 Juanita Drive and NE 170th Street.

18  
19 The Burke-Gilman Trail provides a major bicycle route through Kenmore and is a major  
20 asset to the community for both transportation and recreational purposes. Creating safer  
21 and more attractive connections from neighborhoods to the trail will encourage residents  
22 to make more walking and biking trips and visitors to patronize local businesses near the  
23 trail.

24  
25 As a part of Walkways & Waterways, a voter-approved bond passed in 2016, the 68th  
26 Avenue/Juanita Drive corridor received pedestrian and bicycle safety treatments:

- 27 (1) Juanita Drive NE Pedestrian and Bicycle Safety Improvements: 1.5 miles of new  
28 sidewalk on the east side of Juanita Drive from 143rd Street to NE 170th Street,  
29 buffered bicycle lanes in each direction, bus stop improvements, improved  
30 lighting, and some traffic signal modifications.
- 31 (2) The 68th Avenue NE Pedestrian and Bicycle Improvements: 1.5 miles of new  
32 sidewalk on one side of 68th Avenue NE from NE 182nd Street to 61st Place NE,  
33 new bicycle lanes in each direction, and lighting improvements.

34  
35 In addition to the Walkways and Waterways projects, several other projects were initiated  
36 and completed that provided sidewalk and/or bicycle safety treatments:

- 37 (1) The West Sammamish River Bridge Replacement Project: New sidewalk and bike  
38 facilities on the west side of the road between NE 170th Street and NE 175th  
39 Street, lighting improvements and some traffic signal improvements.
- 40 (2) SR522 West A Project: New sidewalk on the north and south side of SR522 from  
41 61st Avenue NE to 65th Avenue NE along with street lighting and traffic signal  
42 improvements.
- 43 (3) Simonds Road Overlay: New bike lanes added from 92nd Avenue NE to 84th  
44 Avenue NE.

- 1 (4) 62nd Avenue NE Sidewalk Project: New sidewalk on the east side of 62nd Avenue  
2 NE from SR522 to 185th Avenue NE.
- 3 (5) NE 181st Street Sidewalks: New sidewalk along the north and south side of NE  
4 181st from 68th Avenue NE to 73rd Avenue NE and new sidewalk on the north side  
5 from 65th Avenue NE to 67th Avenue NE. Improvements included new street  
6 lighting.
- 7 (6) 73rd Avenue NE Overlay: New bike lanes added from NE 181st St to NE 192nd St.
- 8 (7) NE 153rd Street Sidewalks: New sidewalks on the south side of NE 153rd Street  
9 from 70th NE to Juanita Drive.

### 11 **Transit Availability and Access to High Capacity Transit**

12 Many people use public transit in Kenmore, as evidenced by 2019 ridership and park-and-  
13 ride occupancy levels. The opening of the Lynnwood Link light rail extension in 2024,  
14 particularly the Shoreline South/148th Street station, will provide an opportunity to greatly  
15 expand options for Kenmore residents wishing to ride transit to destinations throughout  
16 the Puget Sound region. Sound Transit's BRT Stride service on SR 522, planned for  
17 implementation in 2026, will provide high-capacity transit service directly in Kenmore,  
18 providing residents with a direct connection to light rail in Shoreline and Stride service on  
19 I-405. There are no planned improvements to parking capacity in Kenmore, by Sound  
20 Transit or Metro, until 2034. Robust local transit options and nonmotorized access  
21 improvements that connect Kenmore neighborhoods to bus service on SR 522 will be  
22 critical components to facilitating reliable access to these regional transit investments.

23  
24 Kenmore is also interested in creation of a Metro-operated water taxi route that would  
25 connect the City to destinations along Lake Washington and Lake Union, providing  
26 another transit option for residents to access this regional employment and education  
27 center.

28  
29 Service cuts are likely to hurt public transit as an attractive travel mode so the City should  
30 closely monitor these developments and advocate for its desire to maintain quality  
31 service. Additionally, infrequent or poorly timed service connections might further  
32 dissuade residents from using transit if it does not provide a fast and reliable trip  
33 compared with auto travel. While Kenmore cannot control transit service levels, the City's  
34 land use vision is designed to create a supportive environment for transit.

### 35 **Limited Nonmotorized Connectivity**

36  
37 The existing transportation network in Kenmore was developed with limited facilities that  
38 can accommodate travel across the City. The 68th Avenue Bridge is the only public  
39 crossing over the Sammamish River in the City and currently acts as one of Kenmore's  
40 most congested points for all roadway users. In 2022, the City completed replacement of  
41 the southbound bridge, which included construction of new sidewalk and bicycle facilities  
42 on the west side of the road between NE 170th Street and NE 175th Street. Even with the

1 bridge improvements, the intersection with SR 522 frequently backs up traffic for long  
2 stretches during peak hours.

3  
4 Similarly, SR 522 serves as another major barrier to north-south connectivity. Its wide  
5 cross-section and limited number of signalized crossings affect all modes of travel,  
6 particularly pedestrians and cyclists. Additional signalized mid-block pedestrian  
7 crossings where warranted would improve crossing options for nonmotorized travelers.

8  
9 East-west travel is also challenging, particularly north of SR 522 east of 73rd Avenue NE.  
10 A lack of walkways or paths for non-motorized users results in long, circuitous routes for  
11 pedestrians and cyclists wishing to travel in this area. Development of new non-  
12 motorized facilities could help to provide these connections.

### 13 **Trends**

14  
15 Aside from existing conditions and challenges, there are other factors that will affect  
16 Kenmore’s transportation system. Growth in downtown Kenmore and throughout the  
17 region generally plays a role in how the City will plan the improvements to its  
18 transportation network for the future.

### 19 **Transportation Related Climate Impacts**

20  
21 The City of Kenmore’s CAP establishes a multi-faceted approach for reducing  
22 greenhouse gas (GHG) emissions associated with transportation. The CAP describes  
23 policies, programs, and infrastructure investments that will help the City achieve its goal  
24 of net zero GHG emissions by 2050. Changes to municipal operations, construction of  
25 dense, mixed-use, and transit-oriented development (TOD), reduced single-occupancy  
26 vehicle (SOV) trips, and incentives for drivers to use electric vehicles (EVs) are the key  
27 transportation-focused strategies included in the CAP.

### 28 **Downtown Development**

29  
30 In 2021, King County updated the 2021 Countywide Planning Policies to include a new  
31 category—Countywide Growth Centers—with zoned densities that support high capacity  
32 transit along existing or planned transit corridors. Designated countywide growth centers  
33 make efficient use of urban land by sufficiently providing housing, employment, and  
34 services in a compact form and density near the high capacity transit areas. Additionally,  
35 designated countywide growth centers use strategies to mitigate identified displacement  
36 impacts of residents and businesses, particularly for Black, Indigenous, and other People  
37 of Color communities; immigrants and refugees; low-income populations; people with  
38 disabilities; and other communities at greatest risk of displacement.

39  
40 Downtown Kenmore is preliminarily designated as a Countywide Growth Center. Policies  
41 focus on mixed use, higher density development, including affordable housing, in the  
42 downtown area as it develops along the SR 522 high capacity transit corridor. Future  
43 redevelopment will add mixed use projects to provide housing, dining, shopping, and

1 other services in the downtown. These land uses will generate additional travel in the  
2 downtown area and, while many people will be able to walk or use public transit for these  
3 trips, the transportation network must be able to support this concentrated growth.

4

5 **Regional Growth**

6 Regional development outside of the City itself is the other major aspect of growth  
7 affecting Kenmore by 2044. South Snohomish County, Bothell, and Woodinville are all  
8 expected to add a substantial number of residents and jobs during this time period and  
9 many of them travel through Kenmore en route to other regional destinations. The  
10 continued tolling of SR520 bridge and expected regional growth south of Kenmore are  
11 likely to have a continued impact on SR522.

## 1 Kenmore Travel Demand Forecasting

2 The GMA requires that the Transportation Element supports the land uses envisioned in  
3 the Comprehensive Plan. Thus, an important component of the work was forecasting how  
4 the future land uses envisioned in the City, as well as regional growth, would influence  
5 demand on Kenmore's transportation network. A description of the travel demand  
6 modeling process is summarized below with more detail about land use assumptions in  
7 **Appendix D-2.**

- 8 • **The Tool.** The PSRC regional Activity Based Travel Demand model was used for  
9 travel demand forecasting.
- 10 • **Estimate Land Use Growth in the City.** The City is planning for expected growth in  
11 housing units and employment over the next 20 years through 2044. The City  
12 allocates the growth throughout Kenmore based on adopted zoning, observed  
13 development patterns, and other city policies.
- 14 • **Capture Regional Growth Patterns.** Other communities throughout the region are  
15 going through this very same process, based on direction from PSRC. Since travel  
16 does not stop at a jurisdiction's borders, it is important to capture how regional  
17 growth could influence travel patterns on Kenmore's streets.
- 18 • **Translating Land Uses into Trips.** The next step is evaluating how the City and  
19 regional growth assumptions described above translate into walking, biking,  
20 transit, and auto trips. The travel model represents the number of housing units  
21 and employees in spatial units called traffic analysis zones (TAZs). TAZs can be  
22 as small as a few street blocks to as large as an entire neighborhood. They provide  
23 a simplified means to represent trip making rather than modeling individual  
24 parcels. The travel model estimates trips generated from each TAZ (both inside  
25 and outside of the City) using established relationships between different land use  
26 types with trip making. These trips are then assigned onto the roadway network to  
27 estimate how much traffic would be on each street during the evening commute  
28 hour.
- 29 • **Model Refinements.** The final step is refining the forecasts based on reality  
30 checks that the travel model may not capture. In this case, forecasts were refined  
31 to reflect the more walkable, urban characteristic planned for Kenmore's  
32 downtown, by recognizing that some short trips could be made by walking and  
33 biking, rather than driving. Moreover, travel patterns were refined to reflect existing  
34 driver preferences, including recognizing the relative attractiveness of the  
35 Simonds Road / 170th Corridor over Juanita Drive.

## 1 GOALS, OBJECTIVES, AND POLICIES

2 Kenmore has established eight goals to accomplish its overall vision for transportation  
3 in the future. The goals establish overarching priorities that serve the vision of this  
4 Transportation Element while objectives and policies lay out specific actions. The  
5 consolidated set of goals, objectives, and policies is included in this chapter.

### 6 7 **GOAL 1. PROVIDE A COMPREHENSIVE TRANSPORTATION NETWORK THAT SAFELY** 8 **ACCOMMODATES LOCAL AND REGIONAL TRAVEL FOR PEDESTRIANS,** 9 **BICYCLISTS, TRANSIT USERS, AND MOTORIZED VEHICLES.**

10 **OBJECTIVE 1.1: Develop and maintain a Layered Network that provides connectivity**  
11 **and recognizes that not all streets provide the same quality of travel**  
12 **experience. Classify streets as State Highways, Major Arterials,**  
13 **Minor Arterials, Collectors, and Local Roads.**

14  
15 Policy T-1.1.1: Ensure that the Layered Network continues to provide for all varieties  
16 of street uses including regional mobility and cross-town trips,  
17 commuting, shopping, recreational travel, property and business  
18 access, and parking, regardless of mode.

19  
20 Policy T-1.1.2: Guide the development of new streets and maintenance of existing  
21 streets to form a well-connected network that accommodates safe,  
22 direct, and convenient access to the existing roadway network for  
23 pedestrians, bicyclists, transit, and automobiles. Prioritize non-  
24 motorized connections to reinforce the City's vision of a pedestrian-  
25 friendly and robust downtown.

26  
27 Policy T-1.1.3: New development should be consistent with the Future Roadway  
28 Network. Cul-de-sac construction should require the approval of the  
29 City Engineer. Pedestrian facilities identified in the City's Sidewalk  
30 Priority Network should be prioritized using the Pedestrian Facilities  
31 Plan. Bicycle facilities should be considered for streets identified  
32 within the Bicycle Priority Network.

33  
34 Policy T-1.1.4: Coordinate with park-and-ride and transit service providers to  
35 reinforce the City's designation as a high capacity transit community,  
36 attracting residential and employment densities that support  
37 ridership along the high capacity corridors. Pursue improvement  
38 projects that are consistent with the Layered Network and which  
39 benefit transit users in Kenmore.

40

1 Policy T-1.1.5: Continue to enhance the City's Layered Network by using the  
2 following methods:

- 3 a. Require dedication of rights-of-way as a condition for  
4 development when the need for such rights-of-way is linked to  
5 the development or where shown on the Future Roadway  
6 Network;
- 7 b. Request donations of rights-of-way to the public;
- 8 c. Purchase rights-of-way in accordance with State laws and  
9 procedures
- 10 d. Acquire development rights and easements from property  
11 owners; and
- 12 e. Implement traffic impact fees with new development consistent  
13 with the City's Traffic Impact Analysis Guidelines to allocate  
14 funding for new multimodal facilities.  
15

16 Policy T-1.1.6: Maintain criteria to consider street vacations. Criteria should  
17 address:

- 18 a. State laws regarding street vacations;
- 19 b. Consistency with the Layered Network, including the effects of  
20 the street vacation on existing and future circulation;
- 21 c. Ability to utilize excess right-of-way for other public purposes  
22 such as parks, recreation, waterfront access, viewpoints,  
23 stormwater management, or affordable housing;
- 24 d. Public benefit of the street vacation; and
- 25 e. Fair compensation.  
26

27 **OBJECTIVE 1.2: Design and maintain transportation facilities consistent with the**  
28 **community vision.**  
29

30 Policy T-1.2.1: Consider the environmental consequences of street design  
31 standards and maintenance practices. Design City-sponsored  
32 transportation projects to minimize impacts to wildlife habitat, the  
33 environment and water quality to the greatest extent feasible. When  
34 preparing City-sponsored transportation project designs or  
35 reviewing development proposals, the City should follow steps  
36 outlined in the *Street Planning Toolkit (Figure T-15)*.  
37

38 Policy T-1.2.2: Require new development to minimize and consolidate access  
39 points along all major and minor arterials, especially along SR 522  
40 and any new arterials that may be developed. Coordinate this effort  
41 with local businesses, property owners, and WSDOT.

- 1  
2 Policy T-1.2.3: Protect rights-of-way from encroachment by structures, fences,  
3 retaining walls, substantial landscaping, or other obstructions to  
4 preserve the public's use of the right-of-way, safety, and mobility.  
5 Protection methods may include minimum setback requirements for  
6 property improvements allowing future roadway expansion, street  
7 use agreements, and development of specific guidelines regarding  
8 installation and maintenance of landscaping within the public right-  
9 of-way.  
10
- 11 Policy T-1.2.4: Maintain a right-of-way use permit application process and criteria  
12 to ensure that temporary development and utility construction  
13 activities do not create adverse safety, environmental, or traffic  
14 impacts.  
15
- 16 Policy T-1.2.5: Ensure pedestrian facilities are designed consistent with ADA  
17 guidelines and that existing infrastructure is updated per the city's  
18 *ADA Transition Plan* to accommodate users of all ages and abilities.  
19 Design curb cuts, ramps, and other facilities to accommodate  
20 pedestrians with a disability or mobility challenges.  
21
- 22 Policy T-1.2.6: Implement the Street Planning Toolkit to provide uniform street  
23 design and maintenance methods that enhance safety for  
24 pedestrians, bicyclists, and motorists.  
25
- 26 Policy T-1.2.7: Ensure structured parking facilities incorporate context sensitive,  
27 preemptive designs that can accommodate changing parking  
28 demand as a result of increased walkability in high-density areas,  
29 such as downtown.  
30

1 **Figure T-15: Street Planning Toolkit**

2 When planning for new or existing roads, the City should implement uniform  
 3 designs and maintenance methods that create a safe, effective, environmentally  
 4 sensitive, and welcoming transportation system for all users in line with the City's  
 5 vision and Comprehensive Plan policies. Throughout this process, the City must  
 6 consider the various financial and non-financial costs of development and  
 7 operation of the transportation system in addition to the concerns of the users.

- 8
- 9
- 10
- 11
- 12
- 13
- 14
- 15
- 16
- 17
- 18
- 19
- 20
- 21
- 22
- 23
- 24
- 25
- 26
- 27
- 28
- Align and locate transportation facilities away from environmentally sensitive areas, consistent with other Comprehensive Plan policies;
  - Minimize and mitigate significant environmental impacts whenever possible, including the incorporation of improvements, such as larger stormwater treatment facilities, to respond to the impacts of climate change. Minimize and mitigate impacts from the transportation network to the environment, terrestrial animal habitat, and aquatic habitats.
  - Whenever practical, incorporate native grasses, shrubs, and trees, and drought-resistant species in the design of roads, planting strips, and medians.
  - Enhance the safety of pedestrians, bicyclists, and motorists through sidewalk or other separated pedestrian facilities and on-street facility location, design, and maintenance, lighting requirements, signs, lane widths and geometrics, and access to properties using the Layered Network as a guide.
  - Consider the conflicts between different users in the design of multi-purpose paths, including the use of separate paths, striping different lanes for pedestrians and cyclists, speed limits, and increased use of protected bicycle facilities on streets to provide additional options for cyclists.
  - Establish standards that discourage excessive parking. Provide options or incentives to reduce underutilized parking lots and encourage alternate modes of travel.

1 **OBJECTIVE 1.3: Improve street safety and function with a particular reference to the**  
 2 **“Target Zero” goal (adopted City Resolution 14-235) to have no**  
 3 **pedestrian or bicycle deaths or serious injuries as the result of a**  
 4 **collision with a motorized vehicle.**

5  
 6 Policy T-1.3.1: Continue to collect data on traffic speed and volume and collisions  
 7 to support studies, operational changes, and designs, enhance  
 8 efforts when possible.

9  
 10 Policy T-1.3.2: Include emergency service providers in review of roadway designs  
 11 to ensure emergency vehicle passage. Design considerations  
 12 include dead-end street lengths, turn-arounds, travel lane widths,  
 13 maximum road grades, and parking location.

14  
 15 Policy T-1.3.3: Implement the City’s Target Zero strategy to focus on transportation  
 16 improvements, education, and enforcement measures to improve  
 17 safety conditions for pedestrians and bicyclists on Kenmore’s  
 18 streets. Use the Local Road Safety Plan to identify and prioritize low-  
 19 cost, quick build, effective enhancements.

20  
 21 **OBJECTIVE 1.4: Develop a transportation system that achieves the following LOS**  
 22 **metrics:**

23  
 24 Policy T-1.4.1: Vehicular LOS:

- 25 • Major Arterials: LOS E or better
- 26 • Minor Arterials and Connectors: LOS D or better
- 27 • Local Streets: LOS C or better
- 28 • Roadways in the Kenmore countywide growth center
  - 29 ○ Signalized intersections shall operate at LOS F or
  - 30 better and not exceed 100 seconds of average total
  - 31 vehicle delay of all movements
  - 32 ○ Unsignalized intersections shall operate at LOS F or
  - 33 better on the minor street approach until a signal
  - 34 warrant is met using the current version of the Manual
  - 35 for Uniform Traffic Control Devices

36  
 37 LOS along SR 522 and 68th Avenue (south of SR 522) / Juanita Drive  
 38 will be measured as average delay at the corridor level rather than  
 39 the intersection level.

40  
 41 Policy T-1.4.2: Pedestrian LOS as described in Table T-4, bicycle LOS as described  
 42 in Table T-5, and transit LOS as described in Table T-6

1 **Table T-4. Pedestrian LOS – Sidewalk Requirements**

LOS	Within Pedestrian Priority Network*
	Pedestrian facility** on both sides of the street with a buffer as indicated in Pedestrian Priority Network
	Pedestrian facility** provided on one side of the street with or without a buffer as indicated in Pedestrian Priority Network
	No pedestrian facility

2 \* The pedestrian LOS standard does not pertain to local streets outside downtown

3 \*\* Pedestrian facility includes sidewalks and paved shoulders protected by a raised curb.

5 **Table T-5. Bicycle LOS – Facility Requirements**

LOS	Within Bicycle Priority Network
	Provides minimum treatment* recommendation, as shown within Bicycle Priority Network
	Provides a lower-level facility* than recommended in the Bicycle Priority Network
	No bicycle facility

6 \* Bicycle facilities – lowest-level to highest-level of treatment: shared; bike lanes; buffered  
7 bike facility; separated trail.

9 **Table T-6. Transit Priority Corridor Level of Service**

LOS	Transit Stop Amenities	Pedestrian Access	Frequency of Service
	High level	Sidewalks and marked crosswalks serving stops	All day service. Peak service 15 minutes or less, midday 30 minutes or less
	Some amenities	Sidewalks and marked crosswalks serving some stops	All day service. Peak services 30 minutes or less, midday service 60 minutes or less
	Little or no amenities	General lack of sidewalks and marked crosswalks	Low level of service

10  
11 **OBJECTIVE 1.5: Perform periodic review and monitoring (every 2-4 years) of the**  
12 **transportation system to ensure it adequately serves existing and**  
13 **future land uses.**

14  
15

1 Policy T-1.5.1: Forecast travel to identify needed transportation improvements. The  
2 forecasts should:

- 3 a. Account for expected changes in personal travel behavior,  
4 funded capital improvements, and feasibility of mode choices;
- 5 b. Use current data and policies;
- 6 c. Be compatible with other jurisdictions and the regional growth  
7 strategy; and
- 8 d. Reflect the Vision Statement and land use policies.

9  
10 Policy T-1.5.2: Identify the improvements and strategies needed to fully implement  
11 the City's *Layered Network* and meet LOS requirements for  
12 transportation.

13  
14 Policy T-1.5.3: Monitor growth in population and employment in relation to the land  
15 use and growth assumptions of the Transportation Element.  
16 Reassess the Land Use and Transportation Elements as needed to  
17 ensure that planned improvements will address the potential  
18 impacts of growth.

19  
20 Policy T-1.5.4: Require construction of necessary transportation improvements  
21 from the private or public sector at the time of development or within  
22 six years of development.

23  
24 **GOAL 2. COORDINATE WITH LOCAL, REGIONAL, STATE, AND FEDERAL AGENCIES**  
25 **AS WELL AS NON-GOVERNMENTAL ENTITIES TO DEVELOP AND OPERATE**  
26 **THE TRANSPORTATION SYSTEM.**

27 **OBJECTIVE 2.1: Support and complement the transportation functions of the State**  
28 **of Washington, transit agencies, and other entities responsible for**  
29 **transportation facilities and services to meet Kenmore's needs.**  
30

31 Policy T-2.1.1: Coordinate planning, construction, and operation of transportation  
32 facilities and programs with the State, Counties, neighboring cities,  
33 PSRC, Metro, Sound Transit, and other entities. This coordination will  
34 be achieved by:

- 35 a. Participating in the transportation-related activities of King  
36 County and other advisory committees;
- 37 b. Working with other jurisdictions to plan, fund, and implement  
38 multi-jurisdictional projects necessary to meet shared  
39 transportation needs; and
- 40 c. Making transportation decisions consistent with the City's  
41 adopted transportation plans in coordination with the State,

1 PSRC, transit agencies, King County, Snohomish County, and  
 2 neighboring jurisdictions.

3  
 4 Policy T-2.1.2: Support increased transit service for the Kenmore Downtown area  
 5 based upon existing and future population and employment  
 6 densities. Support additional market demand for TOD along the SR  
 7 522 corridor to promote Kenmore’s status as a High Capacity Transit  
 8 community and provide residents with access to regional transit.

9  
 10 Policy T-2.1.3: Work with private property owners to create multimodal  
 11 transportation options around the Downtown area to achieve a  
 12 walkable city center that reinforces the community identity and  
 13 provides connections to housing and community destinations.

14  
 15 Policy T-2.1.4: Coordinate planning, construction, and operation of transportation  
 16 facilities and programs with the State, Counties, neighboring cities,  
 17 PSRC, Metro, Sound Transit, and other entities to minimize impacts  
 18 to the environment and aquatic habitats and ensure critical  
 19 infrastructure is in place to respond to both natural disasters,  
 20 human-caused disasters, and climate change impacts.

21  
 22  
 23 **OBJECTIVE 2.2: Cooperate with neighboring cities, King and Snohomish Counties,**  
 24 **transit agencies, PSRC, and WSDOT to address regional**  
 25 **transportation issues.**

26  
 27 Policy T-2.2.1: In partnership with State, regional and local agencies, address  
 28 regional transportation issues. These include:

- 29 d. Regional air, rail, and water transportation facilities and  
 30 services;
- 31 e. Operation of and improvements to the State highway network,  
 32 including SR 522;
- 33 f. Improvements to roadways connecting Kenmore to the  
 34 surrounding region, including SR 522;
- 35 g. Improvements to major roadways bordering, yet having an  
 36 influence upon internal traffic flows within Kenmore, including  
 37 those located in Snohomish County;
- 38 h. Improved access to I-5 and I-405 corridors and other  
 39 employment corridors;
- 40 i. Regional pedestrian and bicycle facility needs;
- 41 j. Transit access to meet the diverse needs of residents for  
 42 populations of all income levels; and

1 k. Consideration of last-mile connection to transit stops for local  
2 and regional users.

3  
4 Policy T-2.2.2: Work with neighboring jurisdictions to ensure that new development  
5 outside of Kenmore does not unreasonably affect transportation  
6 systems, transportation LOS, and the quality of life in Kenmore.  
7 Utilize the following approaches:

8 a. Promote thoughtful planning by neighboring jurisdictions  
9 consistent with comprehensive plans and the regional growth  
10 strategy; and

11 b. Support the establishment of regional traffic planning, expanded  
12 access to transit, improved non-motorized facilities, and  
13 mitigation payment system.

14  
15 Policy T-2.2.3: Coordinate transit levels of service with Metro, Sound Transit, and  
16 private transit operators.

17  
18 Policy T-2.2.4: In partnership with state and other agencies, support development  
19 of a corridor plan for SR 522 to consistently maintain travel  
20 conditions for all users along this route.

21  
22 **OBJECTIVE 2.3: Ensure regional transportation improvements and services are**  
23 **compatible with the Comprehensive Plan and the City's Layered**  
24 **Network.**

25  
26 Policy T-2.3.1: Continue to take a lead role in the planning, design, and  
27 implementation of SR 522 improvements within Kenmore.  
28 Encourage multi-agency cooperation (such as WSDOT and Sound  
29 Transit) and ensure that improvements in Kenmore are coordinated  
30 with adjacent communities.

31  
32 Policy T-2.3.2: Work with the adjacent jurisdictions to coordinate planned  
33 improvements along connecting roads.

34  
35 Policy T-2.3.3: Work with WSDOT to identify and mitigate the impact that  
36 reconstruction and existing and planned toll projects have on  
37 Kenmore; particularly on SR 522.

38  
39 **OBJECTIVE 2.4: Work with business leaders, private owners, and other local**  
40 **organizations to support transportation efforts in reaching mutual**  
41 **goals.**

42  
43 Policy T-2.4.1: Attract and retain future development to Kenmore by directing  
44 growth into its Countywide Growth Center and providing multi-modal  
45 connections to downtown and equitable access to regional transit.

1  
2 Policy T-2.4.2: Provide additional incentives to minimize surface parking within  
3 walkable areas, such as downtown. Ensure that regulations require  
4 appropriate parking for business customers.

5  
6 Policy T-2.4.3 Provide local transit connections from the City's residential areas to  
7 the regional high capacity transit system along the SR 522 corridor.

8  
9 **OBJECTIVE 2.5: Position Kenmore to respond to technological innovations, such as**  
10 **EVs, connected/autonomous vehicles, and intelligent**  
11 **transportation systems.**

12  
13 Policy T-2.5.1: Coordinate with PSRC and other regional entities to understand  
14 regional plans for EV charging and accommodation of other  
15 alternative fuel sources.

16  
17 Policy T-2.5.2: Review vehicle regulations periodically to ensure accordance with  
18 current technologies that can support Kenmore's transportation  
19 system.

20  
21 Policy T-2.5.3: Keep pace with evolving technologies to understand their impacts  
22 on the financing, expansion, and evolving operational and  
23 maintenance needs for transportation facilities.

24  
25 Policy T-2.5.4: Explore micromobility transportation options as an alternate  
26 transportation mode to SOVs. Implement policies and pilot  
27 programs in coordination with other jurisdictions to test their  
28 efficacy in Kenmore.

29  
30 **GOAL 3. PROMOTE A TRANSPORTATION SYSTEM THAT IS SUSTAINABLE FROM**  
31 **FISCAL, ENVIRONMENTAL, AND EQUITY PERSPECTIVES WITH**  
32 **PARTICIPATION FROM BOTH THE PUBLIC AND PRIVATE SECTORS.**

33 **OBJECTIVE 3.1: Emphasize priorities of the community when prioritizing**  
34 **transportation system improvements needed to fully implement the**  
35 **City's Layered Network, including safety, multi-modal mobility,**  
36 **access to transit, maintenance, and congestion relief.**

37  
38 **OBJECTIVE 3.2: Regularly prepare and adopt a Six-Year Transportation**  
39 **Improvement Program to implement the Transportation Element.**

40  
41 Policy T-3.2.1: In preparation of specific planning and implementation documents,  
42 including the Six-Year Transportation Improvement Program, the  
43 City will involve the public, interested agencies, and other  
44 jurisdictions through a clearly stated process that provides

opportunities for review and comments regarding the City's priorities and recommendations.

Policy T-3.2.2: Ensure that plans consider the best available lifecycle cost of an improvement, including operation and maintenance costs; environmental, climate change, economic, and social impacts; and any replacement or closure costs.

**OBJECTIVE 3.3: Leverage City resources and secure adequate funding sources for transportation improvements and services through a variety of mechanisms, including those required as a result of development.**

Policy T-3.3.1: Seek to secure adequate funding sources for transportation through a variety of methods. These methods may include:

- a. Seeking federal and state funds;
- b. Encouraging public/private partnerships for financing transportation projects that remedy existing transportation problems or foster economic growth in Kenmore; and
- c. Encouraging the use of Local Improvement Districts (LIDs) by property owners to upgrade roads to meet City road standards.

Policy T-3.3.2: Ensure shared responsibility of mitigating development impacts between the public and private sector. Require that developers contribute their fair share toward transportation improvements needed to accommodate development through implementation of the City's Traffic Impact Fee program, by providing additional transportation facilities and services in proportion to the impacts and needs generated by the development and encouraging developers to design projects that generate less traffic.

Policy T-3.3.3: Require traffic analyses for new development proposals consistent with the City's *Traffic Impact Analysis Guidelines* that determine the need for transportation improvements that address traffic impacts. Ensure new developments are accordant with the City's vision as a high capacity transit community.

**OBJECTIVE 3.4: Ensure improvements to the transportation network occur concurrently with development.**

Policy T-3.4.1: Allow development only when those proposals are concurrent with specific documentation or plans showing how the transportation system can adequately support existing and proposed development needs.

1 **OBJECTIVE 3.5: Cooperate regionally and strive locally to mitigate transportation**  
2 **impacts to air quality through interconnected land use and**  
3 **transportation strategies.**  
4

5 Policy T-3.5.1: Support ongoing efforts for improving air quality throughout the  
6 Kenmore area and develop a transportation system compatible with  
7 the goals of the Federal and State Clean Air Acts.  
8

9 Policy T-3.5.2: Support local and regional efforts to reduce vehicle emissions.  
10 Support installation of EV charging stations on local privately owned  
11 property and explore options for the development of charging  
12 facilities on publicly owned property. Reduce emissions from City  
13 fleet by implementing a green vehicle selection process, identifying  
14 green fleet resources for new or replacement vehicles, and installing  
15 electric car charging stations in City-owned facilities.  
16

17 Policy T-3.5.3: Coordinate with Metro, Sound Transit, and other jurisdictions on  
18 Commute Trip Reduction (CTR) programs for major employers in  
19 Kenmore.  
20

21 Policy T-3.5.4: Reduce vehicle miles traveled (VMT) of SOVs by implementing  
22 Transportation Demand Management (TDM) programs and  
23 strategies.  
24

25 **OBJECTIVE 3.6: Reduce impacts to water quality with new development and**  
26 **maintenance of the existing transportation system.**  
27

28 Policy T-3.6.1: Design roadway improvements to be consistent with the City's  
29 Surface Water Management Plan, CAP, and stormwater regulations.  
30 Implement, where feasible, green stormwater infrastructure to  
31 reduce stormwater runoff and minimize and mitigate water quality  
32 impacts to aquatic habitats.  
33

34 Policy T-3.6.2: Determine potential surface water retrofitting or treatments that  
35 could be applied in conjunction with transportation improvements.  
36

37 Policy T-3.6.3: Support expanding stormwater facilities along with new projects to  
38 accommodate stormwater runoff adjacent to the project area, when  
39 feasible, to expand treatment to undisturbed but currently untreated  
40 areas.  
41

**GOAL 4. ENCOURAGE PUBLIC TRANSPORTATION, NON-MOTORIZED TRAVEL, AND OTHER TRANSPORTATION STRATEGIES THAT REDUCE THE NEED FOR AUTOMOBILE TRAVEL, ESPECIALLY BY SOVs.**

**OBJECTIVE 4.1: Support expansion of transit service within Kenmore that provides connections to local destinations as well as the regional high capacity transit network.**

Policy T-4.1.1: Support the implementation of Sound Transit’s planned and funded regional BRT along SR 522 and prioritize investments that support high capacity transit stations.

Policy T-4.1.2: Work with Metro and other transit providers to establish local transit service that provides Kenmore residents access to the regional high capacity transit network, as well as connections to the Downtown, major commercial and mixed centers in Kenmore, and other key destinations in the City, and destinations in surrounding communities.

Policy T-4.1.3: Examine the opportunities for increasing transit service with Metro and Sound Transit with priorities tailored to meet the needs of the community by:

- a. Requiring transit facilities as mitigation where appropriate for new developments;
- b. Identifying and developing locations that are accessible to public transportation for use as park-and-pool or park-and-ride lots;
- c. Requiring adequate right-of-way, sidewalk, and roadway improvements where transit stops are located;
- d. Adopting design standards that promote safety and aesthetics in accordance with the *Street Planning Toolkit*; and
- e. Encourage development and maintenance of passenger ferry, water taxi, and or other water-based transportation services on Lake Washington to connect Kenmore to other regional destinations

Policy T-4.1.4: Maintain business access and transit (BAT) lanes on SR 522 for use by transit and business access only to encourage transit usage and improvements, and to preserve its use for transit over the long term.

**OBJECTIVE 4.2: Work with local and regional transit agencies to site, size, and design park-and-ride facilities that reflect the land use vision for the areas in which they are located.**

1 Policy T-4.2.1: Design structured parking facilities as integrated elements of mixed  
 2 use developments with ground floor uses that support TOD, improve  
 3 transit access to support the downtown plan, and improve and  
 4 encourage non-motorized travel to and from high capacity transit  
 5 areas.

6  
 7 Policy T-4.2.2: Explore the potential for joint use of park-and-ride lots with the public  
 8 and private sectors for commercial and residential use.

9  
 10 **OBJECTIVE 4.3: Create an accessible sidewalk and pedestrian trail network linking**  
 11 **neighborhoods, the Downtown, and key community destinations**  
 12 **consistent with that laid out in the *Pedestrian Priority Network*.**

13  
 14 Policy T-4.3.1: Focus early sidewalk improvements on the *Pedestrian Priority*  
 15 *Network*. Prioritize sidewalk investments consistent with the  
 16 *Pedestrian Facilities Plan*, which rank projects based on safety,  
 17 community connections, network connectivity, proximity to schools,  
 18 connections to opportunities, and potential population served.

19  
 20 Policy T-4.3.2: Prioritize implementation of the Americans with Disabilities Act  
 21 (ADA) Transition Plan.

22  
 23 Policy T-4.3.3: Require development to provide sidewalks along one side of the  
 24 roadway or pay a contribution to a sidewalk fund to complete  
 25 missing links, increase pedestrian safety, and provide linkages to key  
 26 destinations in accordance with the *Pedestrian Priority Network*.

27  
 28 Policy T-4.3.4: Design and construct accessible pedestrian facilities in accordance  
 29 with the *Pedestrian Priority Network*, *ADA Transition Plan*, and street  
 30 classification system.

31  
 32 Policy T-4.3.5: As part of the *Pedestrian Priority Network*, provide crosswalks at key  
 33 locations such as in the Downtown, on SR 522 near park-and-ride lots  
 34 and transit stops, near schools, and at other locations with  
 35 significant pedestrian volumes.

36  
 37 Policy T-4.3.6: Explore opportunities to utilize undeveloped rights of way to develop  
 38 and maintain safe pedestrian connections.

39  
 40 Policy T-4.3.7: Consider future bond measures to fund pedestrian projects that  
 41 expand the pedestrian network.

42  
 43 **OBJECTIVE 4.4: Implement a comprehensive *Bicycle Priority Network* in Kenmore.**

44  
 45 Policy T-4.4.1: Require roadway development to include bicycle facilities in  
 46 accordance with the *Bicycle Priority Network*.

1  
2 Policy T-4.4.2: Prioritize future bicycle facility improvements that increase safety  
3 for bicyclists, link to key destinations, promote multi-modal trips,  
4 complete gaps in the existing bicycle system, provide linkages to the  
5 Burke-Gilman Trail and other key off-road facilities, and meet other  
6 priorities for bicyclists in Kenmore.

7  
8 Policy T-4.4.3: Encourage off-road non-motorized vehicle facilities on designated  
9 trails. Promote the on-going maintenance and use of the Burke-  
10 Gilman Trail.

11  
12 Policy T-4.4.4: Promote non-motorized vehicle trails in utility corridors or  
13 undeveloped rights of way where consistent with environmental  
14 constraints.

15  
16 Policy T-4.4.5: Allow for a secondary pedestrian and bicycle loop around the  
17 downtown area with connections to the waterfront and high capacity  
18 transit areas.

19  
20 Policy T-4.4.6: Accommodate bicycles and non-motorized vehicles in the design  
21 and management of the City's *Layered Network* in accordance with  
22 the *Bicycle Priority Network*.

23  
24 **OBJECTIVE 4.5: Implement programs and regulations that help reduce the use of**  
25 **SOVs.**

26  
27 Policy T-4.5.1: Create and implement development standards that:  
28 a. Encourage continuous, direct, convenient non-motorized  
29 linkages;  
30 b. Provide sufficient illumination in parking lots and along travel  
31 routes to increase visibility and security for non-motorists;  
32 c. Minimize front yard parking along commercial street fronts,  
33 particularly in the Downtown;  
34 d. Establish standards that discourage excessive parking. Provide  
35 options or incentives to reduce underutilized parking lots and  
36 encourage alternate modes of travel;  
37 e. Promote mixed-use development in the Downtown; and  
38 f. Require minimum densities through floor area ratios,  
39 employment levels, and / or business retention and expansion  
40 activities in the Downtown and major commercial areas to  
41 support transit.  
42

1 Policy T-4.5.2: Implement the City's CTR Ordinance applicable to large employers in  
2 accordance with State laws.

3  
4 Policy T-4.5.3: Support the goals of the PSRC's Regional TDM Action Plan to  
5 manage travel behavior and reduce vehicle trips.

6  
7 Policy T-4.5.4: Encourage the use of carpools and other non-motorized modes of  
8 travel as an alternative to SOVs and implement educational  
9 programs to expand awareness of available programs.

10  
11 **GOAL 5. MAINTAIN THE AVAILABILITY OF SAFE AIR TRAVEL SERVICES IN**  
12 **KENMORE.**

13 **OBJECTIVE 5.1: Support the continued operation of the Air Harbor to provide private**  
14 **air transportation services to the region and community.**

15  
16 Policy T-5.1.1: Recognize the Kenmore Air Harbor as a business that is  
17 economically and historically significant to the community.

18  
19 Policy T-5.1.2 Provide multimodal connections from Kenmore Air Harbor to  
20 downtown commercial areas.

21  
22 **OBJECTIVE 5.2: Plan for appropriate uses and activities in the vicinity to minimize**  
23 **impacts to and from the Air Harbor.**

24  
25 Policy T-5.2.1: In consultation with the State and the Air Harbor operator, comply  
26 with State laws requiring plans and regulations that discourage the  
27 siting of incompatible uses adjacent to the Air Harbor.

28  
29 Policy T-5.2.2: Ensure plans and regulations address the Air Harbor as an allowed  
30 use and, where appropriate, acknowledge compatibility issues  
31 including height hazards, safety, and noise that can affect the long-  
32 term viability of the Air Harbor. Consider WSDOT guidelines  
33 addressing airports and compatible land use as well as guidance  
34 from the PSRC Airport Compatible Land Use Program. Allow  
35 compatible uses, buildings, or land or water activities in the vicinity  
36 that do not present safety problems to normal Air Harbor operations,  
37 or that would not be sensitive to noise from the Air Harbor  
38 operations.

39 Policy T-5.2.3: Support the use of non-leaded aviation fuel to reduce the risk of  
40 potential health impacts in areas near the Air Harbor.

41  
42 **OBJECTIVE 5.3: Work with the Air Harbor to ensure compliance with appropriate**  
43 **noise and safety standards.**

1 Policy T-5.3.1: Work in partnership with the Air Harbor to address noise  
2 management and compliance with Federal, State and local noise  
3 ordinances. Consider a special overlay or property title process that  
4 identifies the noise-related impacts of the Air Harbor.

5  
6 Policy T-5.3.2: Work in partnership with the Air Harbor to ensure safe operations in  
7 compliance with Federal and State aeronautic safety requirements.

8  
9 **GOAL 6. PROVIDE A TRANSPORTATION SYSTEM THAT FACILITATES FREIGHT**  
10 **MOBILITY AND ECONOMIC PROSPERITY.**

11 **OBJECTIVE 6.1: Support the efficient movement of goods in Kenmore’s commercial**  
12 **areas to support the local economy.**

13  
14 Policy T-6.1.1: Consider the needs for delivery and collection of goods at local  
15 businesses by truck and ensure future transportation improvements  
16 address the needs of large trucks in accordance with the *Freight*  
17 *Priority Network*.

18 Policy T-6.1.2: Monitor commercial truck traffic to ensure use of appropriate  
19 corridors to support efficient movement of goods and safety of local  
20 streets. Utilize the WSDOT classification system to determine freight  
21 and goods movement routes.

22  
23 **OBJECTIVE 6.2: Accommodate local deliveries and other goods movement that are**  
24 **necessary to serve Kenmore residents.**

25  
26 Policy T-6.2.1: Work with local industries and freight companies to understand their  
27 needs for adequately moving goods.

28  
29 Policy T-6.2.2: Ensure roadway improvements do not unnecessarily impede delivery  
30 vans and other small freight trucks.

31  
32 **GOAL 7. PROMOTE TRANSPORTATION EQUITY THROUGH SERVICES AND**  
33 **INFRASTRUCTURE IMPROVEMENTS.**

34 **OBJECTIVE 7.1: Promote transportation improvements that provide equitable**  
35 **access and benefits for all Kenmore residents.**

36  
37 Policy T-7.1.1: Support transportation improvements that provide broad access to  
38 jobs, healthcare, goods and services, and social opportunities.

39  
40 Policy T-7.1.2: Perform periodic review and monitoring of socio-demographic,  
41 economic, and geographic population trends to identify  
42 transportation facilities and services needed for all Kenmore  
43 residents.

44

1 Policy T-7.1.3: Ensure transportation improvements do not impose external  
 2 impacts on historically marginalized or underserved communities,  
 3 such as increased air pollution, infrastructure costs, or crash risk.

4  
 5 Policy T-7.1.4: Prioritize implementation of the ADA Transition Plan  
 6

7 **OBJECTIVE 7.2: Provide a transportation network that promotes inclusive and**  
 8 **affordable services to all Kenmore residents, regardless of mode**  
 9 **choice.**

10  
 11 Policy T-7.2.1: Promote projects that expand bicycle and pedestrian facilities and  
 12 access to transit for historically marginalized or underserved  
 13 communities.

14  
 15 Policy T-7.2.2: Promote inclusive transportation modes and accessible community  
 16 development that provide basic mobility to historically marginalized  
 17 or underserved communities.

18  
 19 Policy T-7.2.3: Incorporate environmental justice criteria into the transportation  
 20 improvement program review process to identify disproportionate  
 21 effects on historically marginalized or underserved communities.

22  
 23 **OBJECTIVE 7.3: Promote collaborative planning processes through authentic,**  
 24 **active partnerships with historically underrepresented community**  
 25 **groups.**

26  
 27 Policy T-7.3.1: Work with historically marginalized or underserved communities and  
 28 local organizations to identify transportation facilities improvements.

29  
 30 Policy T-7.3.2: Recognize and support individuals or groups who have historically  
 31 been underrepresented in transportation planning and/or  
 32 infrastructure development, such as people of color, indigenous and  
 33 immigrant populations, to identify and correct structural or system  
 34 inequities in the transportation network to promote social justice.

35  
 36  
 37 **GOAL 8. SUPPORT TRANSPORTATION INVESTMENTS THAT MINIMIZE, MITIGATE,**  
 38 **AND RESPOND TO THE EFFECTS OF CLIMATE CHANGE.**

39 **OBJECTIVE 8.1: Balance transportation demands with environmentally sustainable**  
 40 **growth strategies consistent with the City's CAP to minimize long-**  
 41 **term climate impacts.**

42  
 43 Policy T-8.1.1: Prioritize dense, mixed-use, and transit-oriented development to  
 44 reduce SOV travel and GHG emissions.  
 45

1 **OBJECTIVE 8.2: Reduce VMT by promoting alternative transportation modes and**  
2 **access to high capacity transit.**

3  
4 Policy T-8.2.1: Implement TDM programs and strategies that facilitate transit use.

5  
6 Policy T-8.2.2: Prioritize infrastructure improvements that include new bicycle and  
7 pedestrian connections through project selection.

8  
9 Policy T-8.2.3: Provide amenities that support bicycle and pedestrian users, such  
10 as bike storage, bike parking, and wayfinding signage near the  
11 downtown area.

12  
13 Policy T-8.2.4: Provide educational and encouragement programming that  
14 improves public awareness of Kenmore's bicycle and pedestrian  
15 networks.

16  
17 **FUTURE TRANSPORTATION SYSTEM**

18 Kenmore envisions a future transportation system that serves all users and modes of  
19 travel by offering a safe and robust network of walkways, bicycle facilities, intersections,  
20 and roadways that connect neighborhoods and provide access to transit. This section  
21 describes Kenmore's vision for its future transportation network and the infrastructure  
22 improvements that will get the City there.

23  
24 As identified in this element, most of the improvements are focused on the development  
25 of a 'layered' transportation network, which focuses less on providing vehicular capacity  
26 and more on accommodating all modes of travel. While some of the roadway  
27 improvements are needed to meet the City's vehicular LOS standard, most of the future  
28 improvements focus on providing safer and more complete facilities for walking,  
29 bicycling, and riding transit in order to improve access and mobility for all road users.

30  
31 **Introduction to the Layered Network**

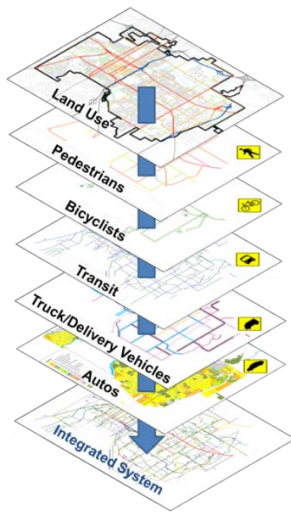

32 It can be a challenge for a single roadway to meet the demands and expectations of all  
33 modes at any given time. Accommodating all users and modes could result in wide or  
34 large roadways that are expensive to develop and maintain and do not necessarily reflect  
35 the neighborhood character. Alternately, trying to minimize roadway widths and  
36 infrastructure costs can result in a lack of facilities and thus less safe conditions for  
37 users.

38  
39 In response to this challenge, the City of Kenmore has adopted a layered network  
40 approach that focuses on how the City's transportation network can function as a system  
41 to meet the needs of all users. In such a system, individual travel modes are prioritized  
42 on different facilities throughout the overall network. This approach promotes a balanced  
43 transportation system to serve diverse user needs including sidewalk and bicycle

1 investments, improved access to transit, and roadway improvements for vehicles. **Figure**  
 2 **T-16** illustrates the concept of a layered network.

3  
 4 The City implements this layered network through a system of roadway typologies that  
 5 define each street's user priorities and associated infrastructure needs.  
 6

7 **Figure T-16: Layered Network Concept**

8  
 9

10 **Roadway Typologies**

11 The following street typologies dictate the form and intended functions of roadways in  
 12 Kenmore. While some roadways are intended to serve regional travel and vehicle  
 13 circulation, other facilities provide safe options for a more multimodal user base. A  
 14 description of each roadway type follows and detailed fact sheets are available in  
 15 **Appendix D-3**.

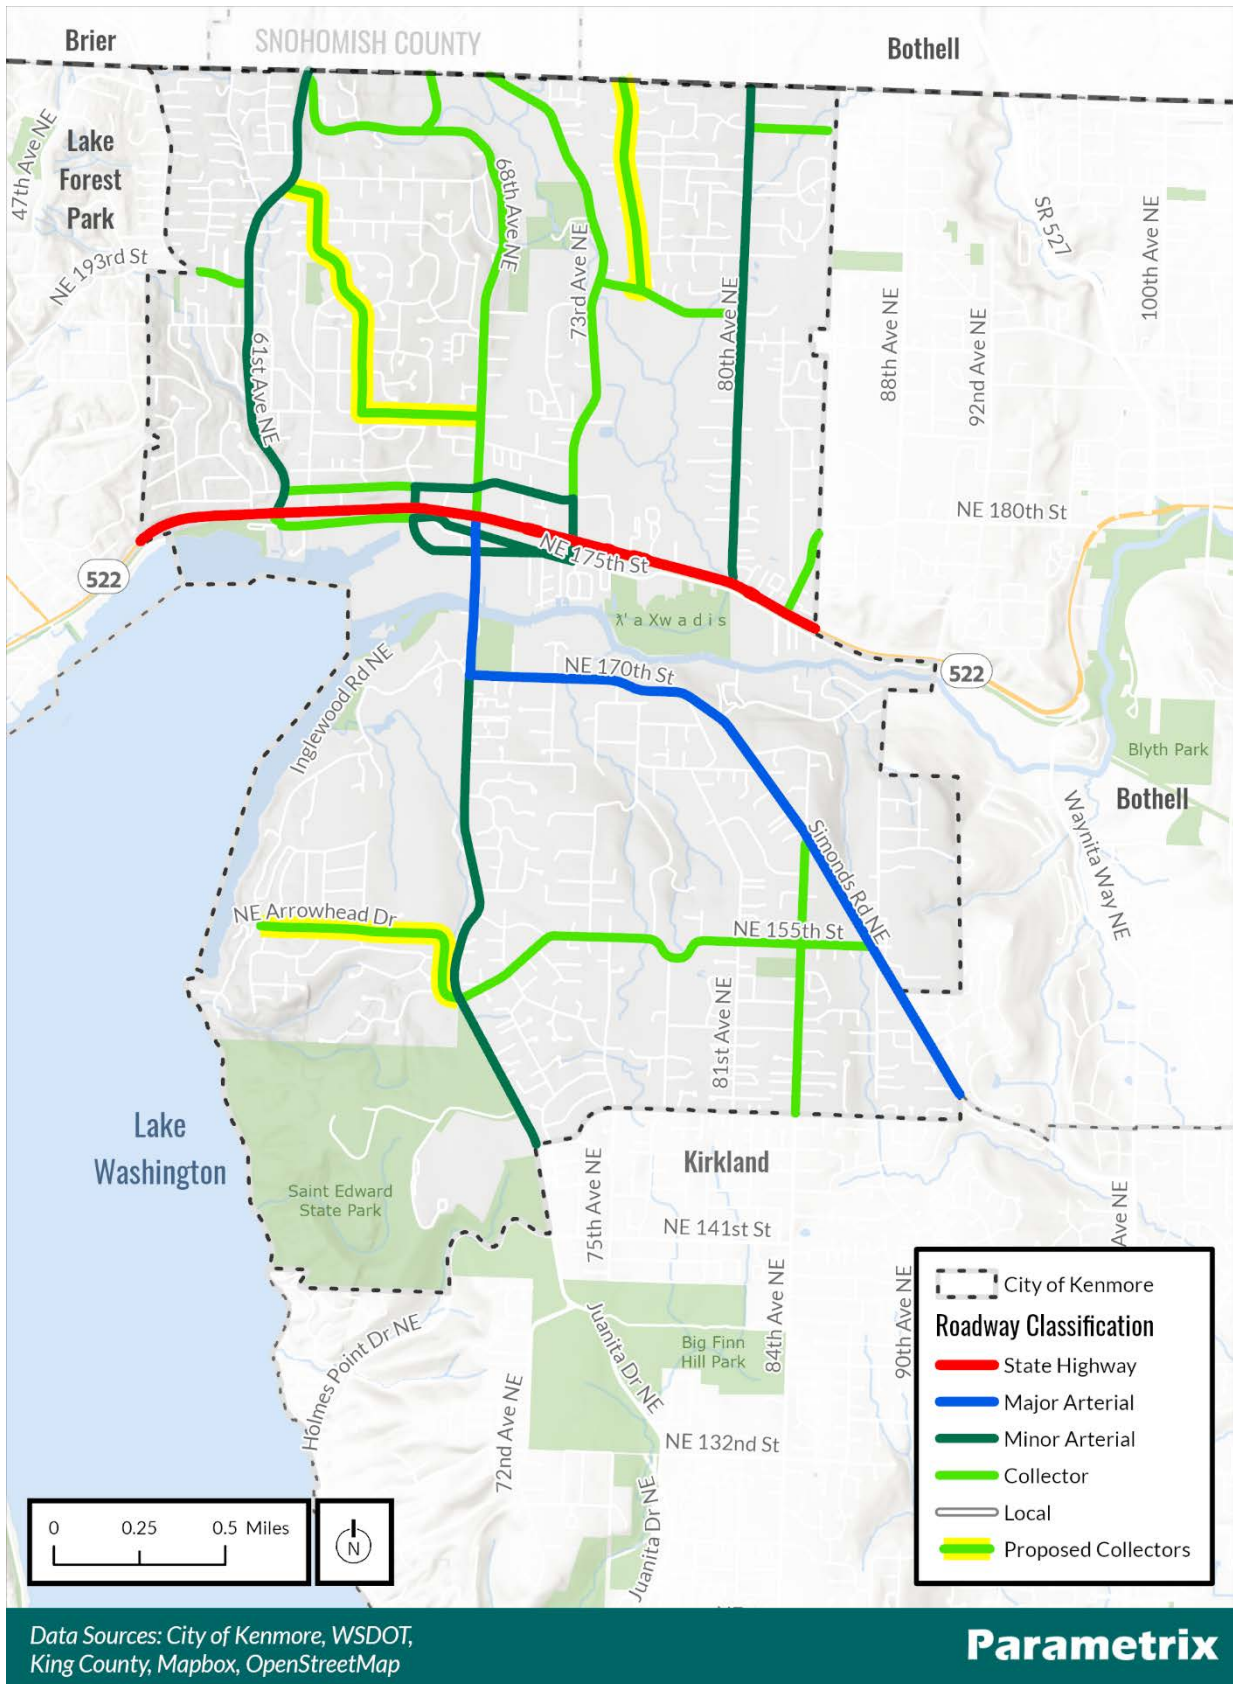

16

17 The roadway types are as follows and are displayed in **Figure T-17**. In addition to existing  
 18 classifications, **Figure T-17** displays roadways proposed for reclassification from Local  
 19 to Collector.

- 20
- State Highway/Major Arterial – Most conducive for crosstown trips and focus on transit, freight, and auto mobility.
  - Minor Arterial – Signals the entry into a higher-density commercial or residential zone. Emphasizes multimodal interactions and travel experience.
  - Collector – Provides a connection between local streets and arterials for a safe travel experience for bicycles and pedestrians.
  - Local Street – Prioritizes local access (driveways, on-street parking) and pedestrian travel. Bicycles share the roadway.
- 27

1 **Figure T-17: City's Street Network**

2

1 **Modal Networks**

2 Each roadway type focuses on and prioritizes a different balance of users, both in terms  
 3 of trip purpose and travel mode. The transportation network in Kenmore was developed  
 4 by identifying desirable roads for each mode, combining them to locate overlaps, and  
 5 then assigning priority to certain modes. The following sections review the priority  
 6 networks for each mode and establish their LOS standards.

7  
 8 **Walking**

9 While Kenmore’s local streets generally tend not to need fully separate sidewalks or paths  
 10 due to their low traffic volumes and slow speeds, the City’s state routes, arterials,  
 11 collectors, and some local streets do warrant pedestrian infrastructure. **Figure T-18**  
 12 highlights the Pedestrian Priority Network, indicating whether pedestrian infrastructure  
 13 should be provided on both sides or one side of the street. The Pedestrian Facilities Plan  
 14 identifies prioritized sidewalk projects throughout the city based on extending the  
 15 existing sidewalk network, connections to the existing sidewalk network, and creating  
 16 sidewalk on both sides of arterial and collector roads.

17  
 18 Building on the Pedestrian Priority Network above, **Table T-7** establishes the LOS  
 19 standard for pedestrian facilities around the City. The best LOS for walking, indicated as  
 20 the green standard, would provide walkways with buffers as shown in the Pedestrian  
 21 Priority Network. The yellow LOS standard, which meets the basic needs for safe walking  
 22 around the City, requires sidewalks or paved shoulders protected by raised curbs on one  
 23 side of all the streets called out in the Pedestrian Priority Network. Incomplete or missing  
 24 pedestrian facilities would fall into the red category and not satisfy the City’s LOS for  
 25 walking. The pedestrian LOS standard does not pertain to local streets, as low-volume  
 26 roadways may be adequate for pedestrians without separated facilities based on their  
 27 characteristics and should be evaluated on a case-by-case basis.

28  
 29 In addition to the presence of pedestrian facilities along a corridor, the City also  
 30 emphasizes the importance of safe pedestrian crossings. Particularly downtown and  
 31 within ½ mile of schools, the City looks to provide enhanced crossings at regular intervals  
 32

33 **Table T-7. Pedestrian LOS – Sidewalk Requirements**

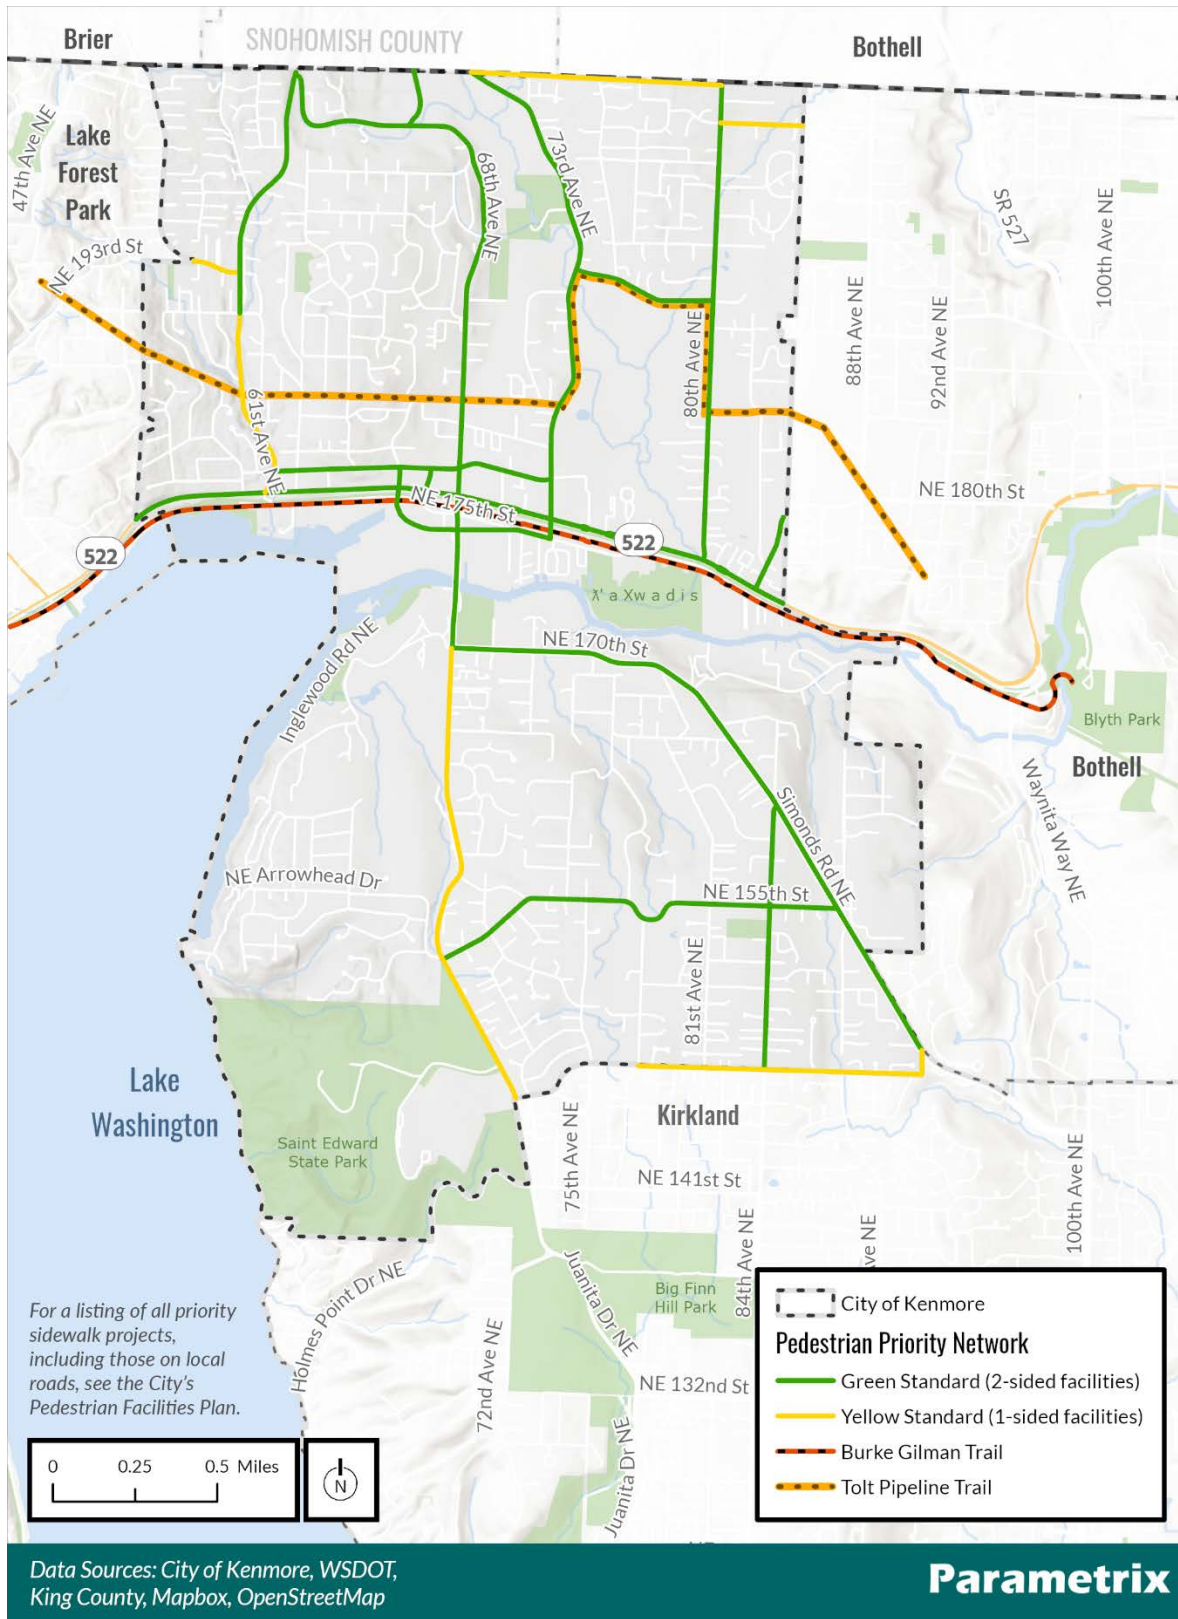

LOS	Within Pedestrian Priority Network*
	Pedestrian facility** on both sides of the street with a buffer as indicated in Pedestrian Priority Network
	Pedestrian facility** provided on one side of the street with or without buffer as indicated in Pedestrian Priority Network
	No pedestrian facility

34 \* The pedestrian LOS standard does not pertain to local streets outside downtown

35 \*\* Pedestrian facility includes sidewalks and shoulders protected by a raised curb.

36

1 **Figure T-18: Pedestrian Priority Network – Future Vision**

2

## 1 **Bicycling**

2 Kenmore already sees significant levels of bicycling along the Burke-Gilman Trail and  
 3 Juanita Drive, which serve as major commuter and recreational corridors. Connecting to  
 4 these routes from other areas of the City can be difficult, however, due to challenging  
 5 topography and limited through streets in some neighborhoods. Key mobility corridors  
 6 for bicyclists include 68th Avenue / Juanita Drive / Simonds Road which have buffered  
 7 bicycle facilities.

8  
 9 Similar to Pedestrian LOS, the City of Kenmore can strive for the green LOS for bicycling  
 10 by installing the bicycle facilities depicted in the Bicycle Priority Network or a facility that  
 11 offers more separation from vehicle traffic. At a minimum, the City plans to provide the  
 12 yellow LOS by installing some sort of bicycle infrastructure on the streets identified in the  
 13 Bicycle Priority Network (see **Figure T-19**). These facilities would be signed bike routes.  
 14 Incomplete or missing bicycle facilities would fall into the red standard and not meet the  
 15 City's LOS for bicycling. The LOS standards for bicycle facilities are described in **Table T-**  
 16 **8.**

17  
 18 **Table T-8. Bicycle LOS – Facility Requirements**

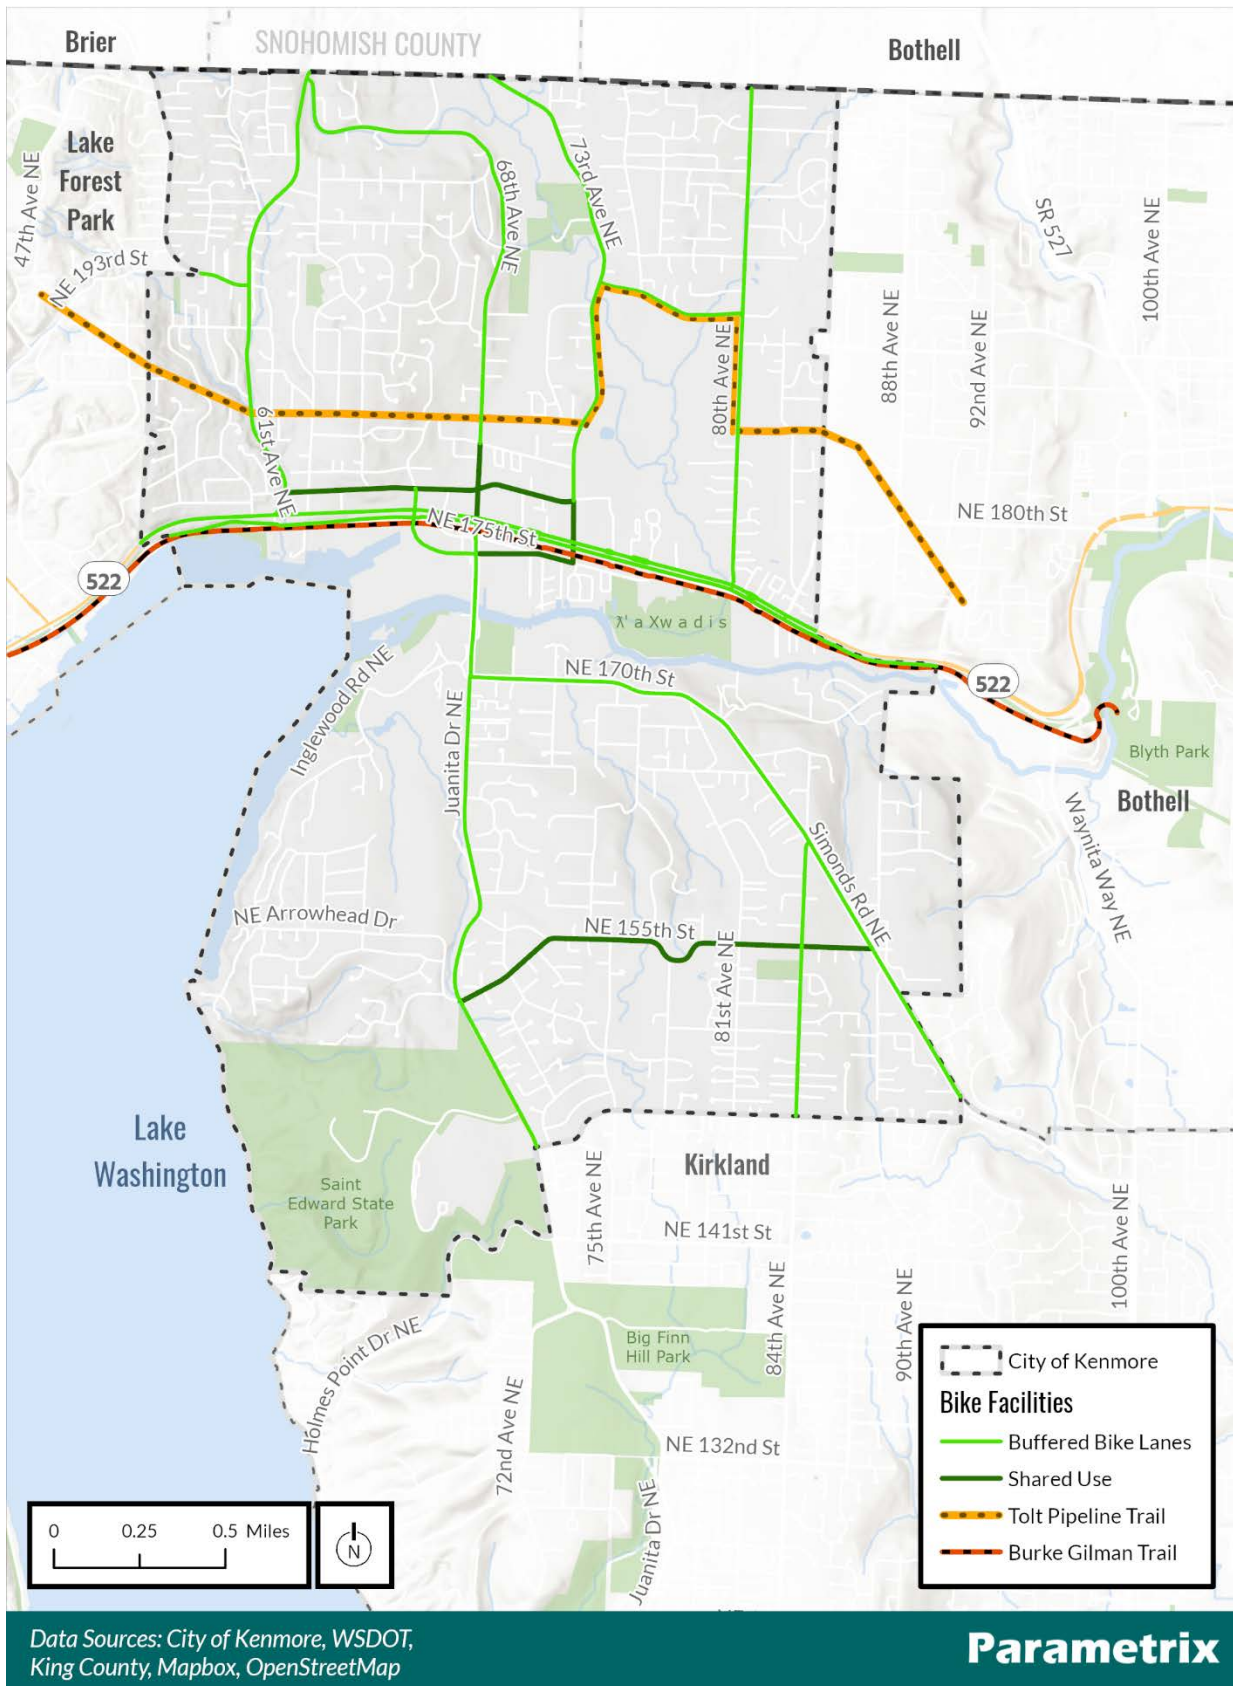

LOS	Within Bicycle Priority Network
	Provides minimum treatment* recommendation, as shown within Bicycle Priority Network
	Provides a lower-level facility* than recommended in the Bicycle Priority Network
	No bicycle facility

19 \* Bicycle facilities – lowest-level to highest-level of treatment: shared; bike lanes; buffered bike facility;  
 20 separated trail.

21

1 **Figure T-19: Bicycle Priority Network – Future Vision**

2

## 1 Transit

2 Transit operations are out of the City’s direct control, but Kenmore can still aim to create  
3 corridors that are welcoming to transit. The Transit Priority Network identifies the  
4 corridors that the City should focus their efforts on and is shown in **Figure T-20**. The City  
5 can improve the transit user’s comfort and safety by providing:

- 6 • Street lighting
- 7 • Right of way for bus shelters and benches or requiring installation of transit  
8 facilities as a condition of private development
- 9 • Safe routes for accessing transit stops

10  
11 Kenmore’s transit LOS is defined based on the amenities, access, and service frequencies  
12 discussed above. The City can achieve the green LOS standard by providing a high level  
13 of the transit supportive amenities at major stops, installing sidewalks and marked  
14 crosswalks at all stops, and encouraging and permitting housing and employment  
15 densities that support frequent, all day transit service, including Sound Transit’s planned  
16 SR 522 BRT service. The yellow standard, which the City has adopted as its minimum  
17 target, includes some transit stop amenities, sidewalks and marked crosswalks at some  
18 stops, and all day service with headways of 30 minutes or less during the peak hour and  
19 60 minutes or less during midday. Kenmore’s measurement of transit LOS is summarized  
20 in **Table T-9**.

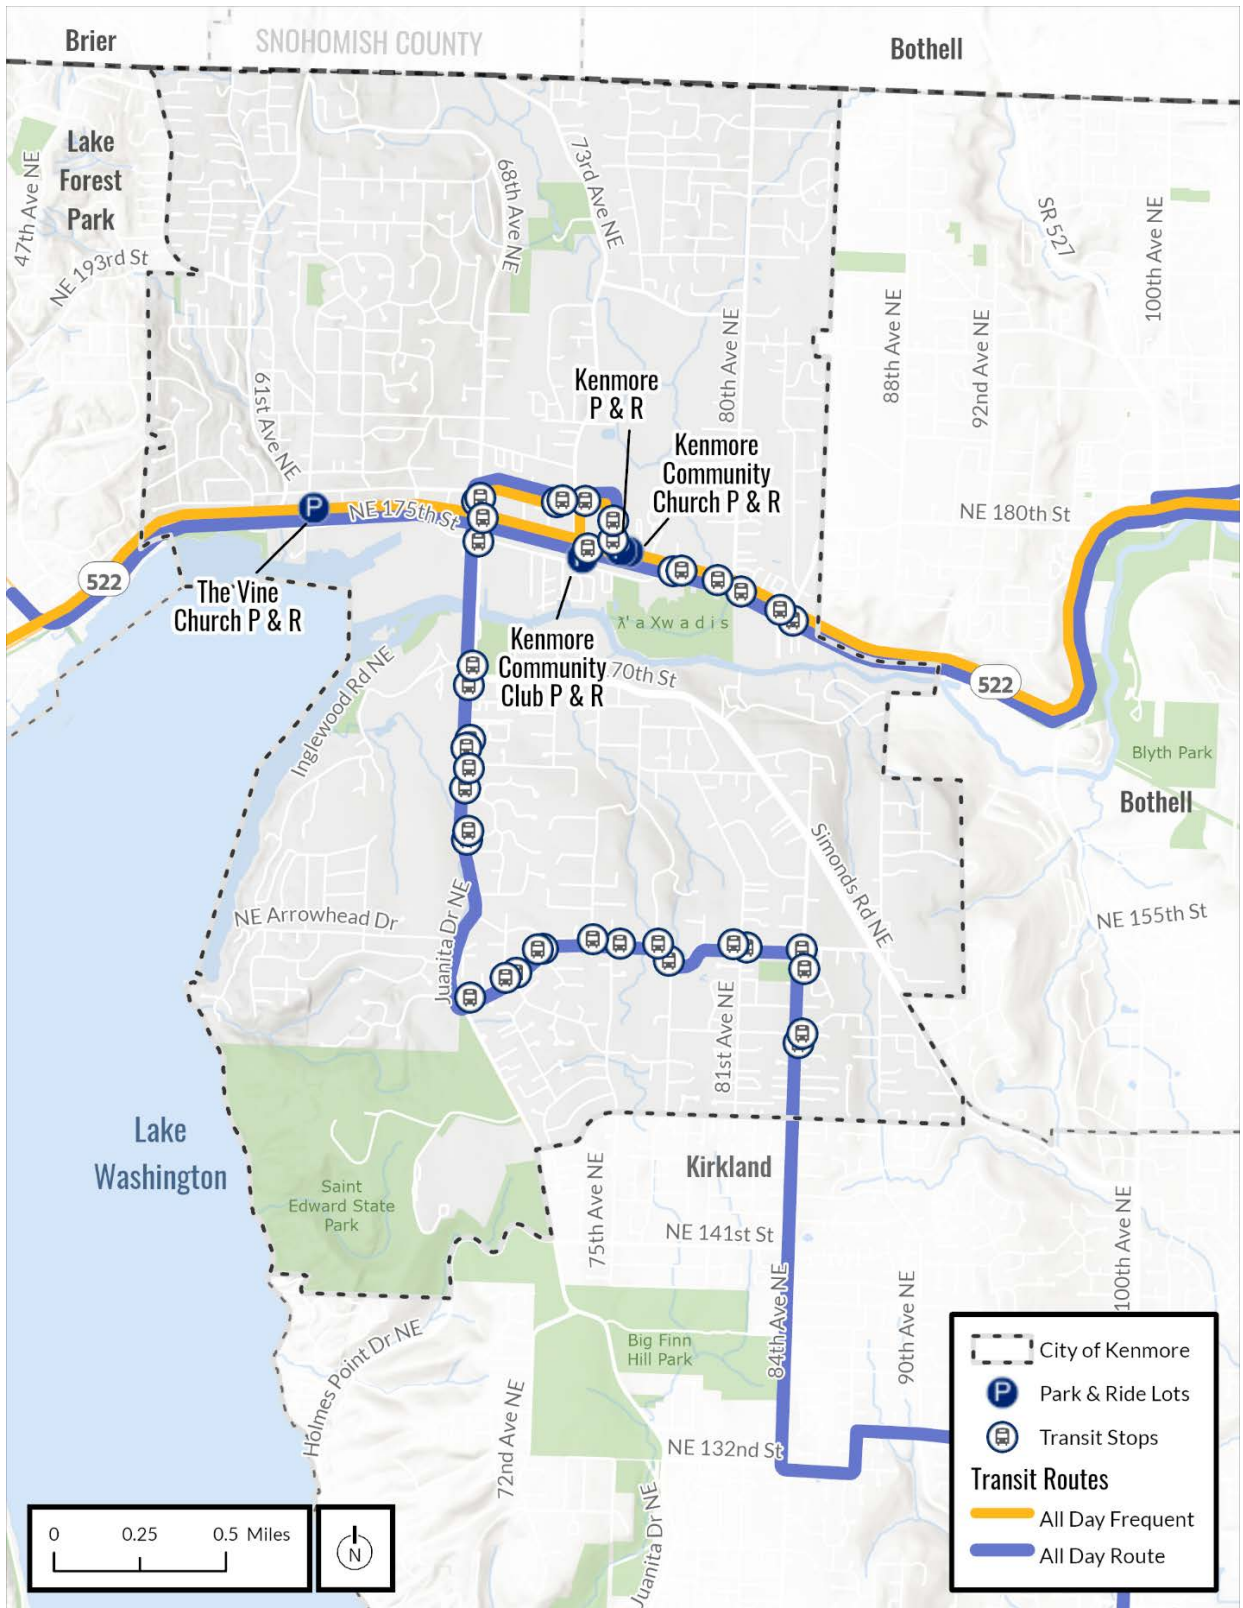

21  
22 **Table T-9. Transit Priority Corridor Level of Service**

LOS	Transit Stop Amenities	Pedestrian Access	Frequency of Service
	High level	Sidewalks and marked crosswalks serving stops	All day service. Peak service 15 minutes or less, midday 30 minutes or less
	Some amenities	Sidewalks and marked crosswalks serving some stops	All day service. Peak services 30 minutes or less, midday service 60 minutes or less
	Few or no amenities	General lack of sidewalks and marked crosswalks	Low level of service

23  
24 While the City itself does not operate transit, providing amenities and transit supportive  
25 uses and densities can encourage residents and employees to use transit and therefore  
26 justify additional service hours from Metro and Sound Transit.  
27

**Parametrix**

2

## 1 Freight and Auto

2 Residents and workers in Kenmore use nearly every street in the roadway network at  
3 some point each day to access their homes, jobs, and other destinations. The highest  
4 volumes of automobile traffic currently occur on arterial and collector roadways whereas  
5 local streets do not see significant traffic volumes throughout the day. Similarly, goods  
6 movement predominantly utilize arterial and collector roadways, with local streets used  
7 mostly for residential deliveries.

8  
9 **Figure T-17** identifies the classification of each of Kenmore’s streets, in terms of whether  
10 it is a state route, arterial, collector, or local road. These classifications indicate the  
11 intended function of each street, specifically in terms of its intended function in  
12 facilitating vehicle and freight mobility as well as other models. These classifications  
13 (further described in **Appendix D-3**) should guide future investments in streetscape and  
14 LOS objectives.

15  
16 The expected growth in Kenmore and across the region over the next 20 years will  
17 generate higher auto volumes on City roadways and increase delay at several  
18 intersections. **Figures T-21 and T-22** displays the forecast level of service performance  
19 at several intersections in Kenmore’s street network in 2030 and 2044, respectively.

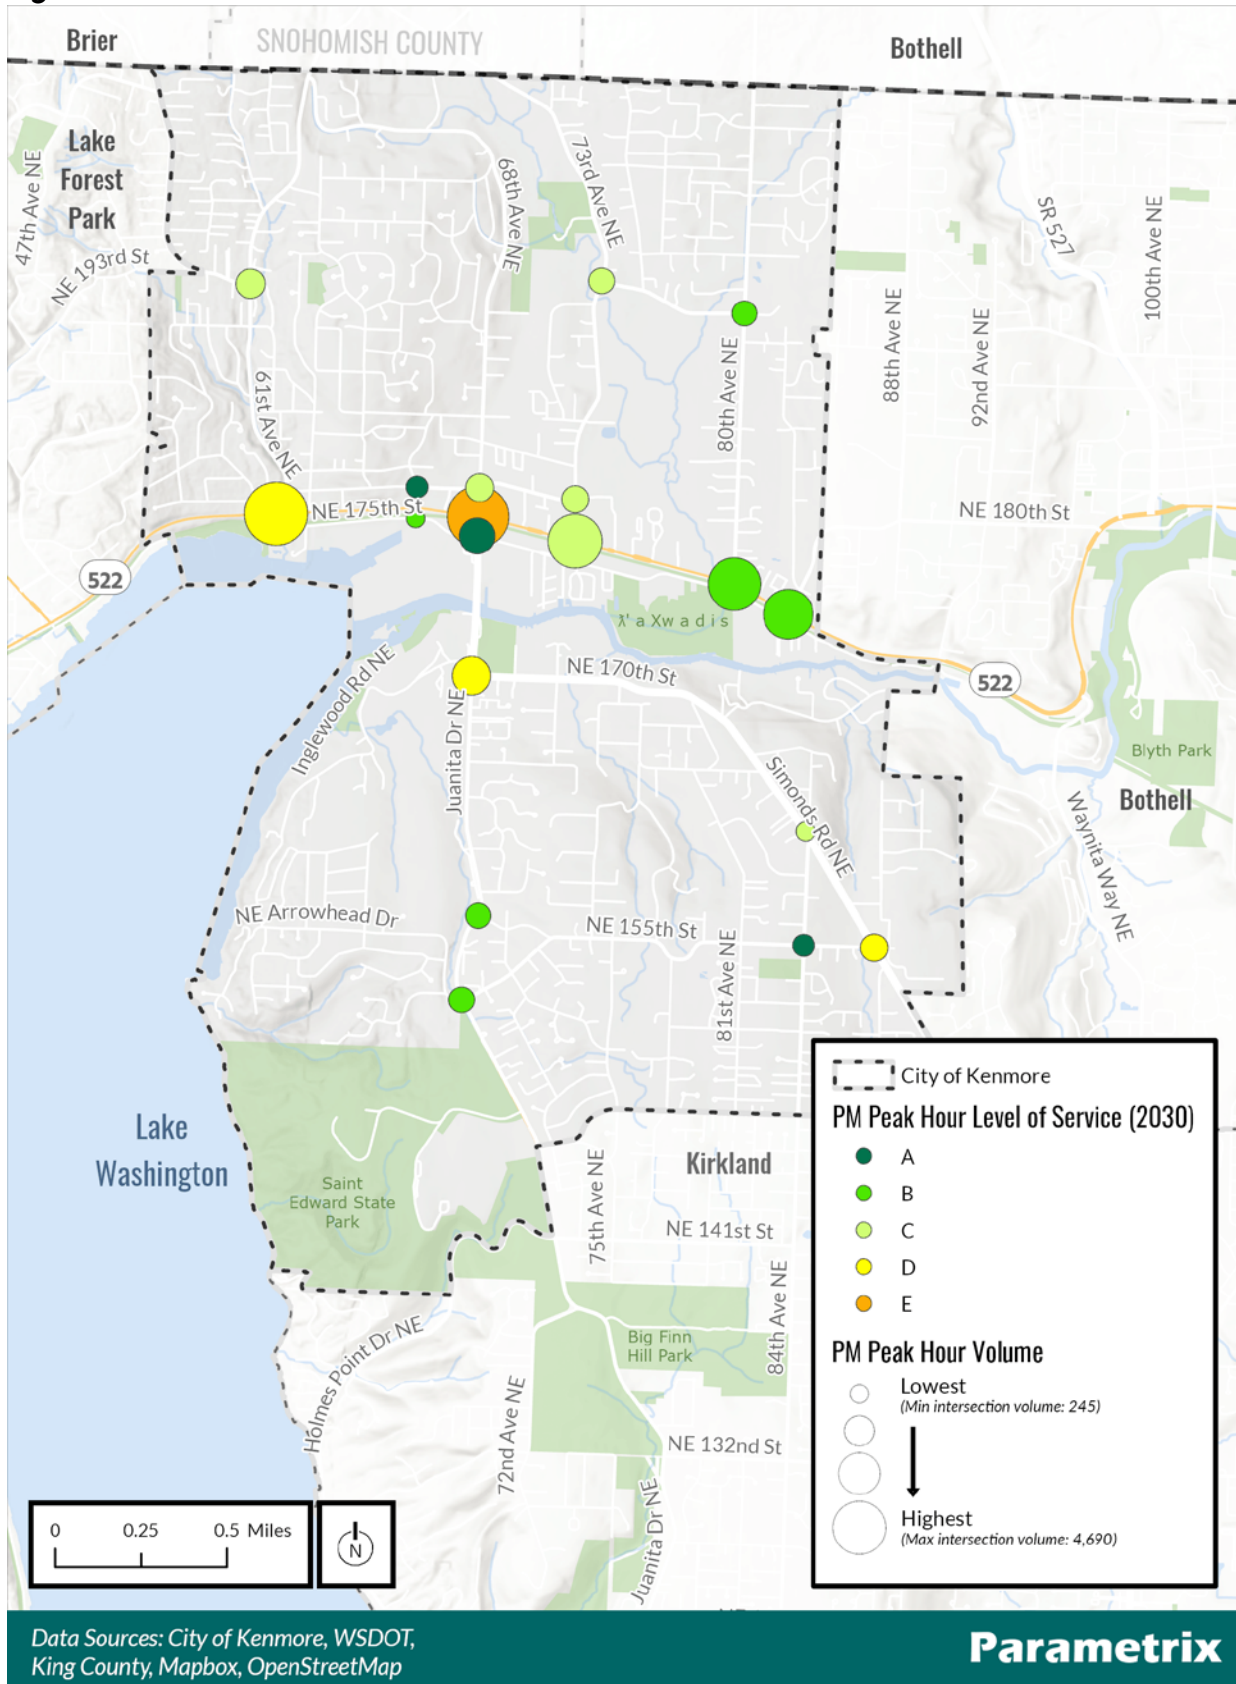

20  
21 While delays are forecasted to increase at some intersections, with the exception of  
22 several along SR 522, all intersections in Kenmore are forecast to perform at or better  
23 than the adopted LOS standard described in Policy T-1.4.1.

24  
25 As noted in Policy T-1.4.1, the City measures LOS at the corridor level on SR 522 and 68th  
26 Avenue (south of SR 522) / Juanita Drive / Simonds Road rather than at the intersection  
27 level. Although several individual intersections on these corridors are forecast to  
28 experience longer delays than indicated by the standard, the safety and comfort of  
29 pedestrians and bicyclists is prioritized at intersections throughout the city. For this  
30 reason, average delay along the corridor is a more meaningful LOS standard than the  
31 experience at a single intersection.

32  
33 The forecasted level of service along SR 522 in Kenmore does not meet WSDOT’s current  
34 LOS standard of D but it does meet the City’s concurrency standards of LOS E for Major  
35 Arterials. As a Highway of Statewide Significance, SR 522 is not subject to City  
36 concurrency standards and the City is not responsible for the regional traffic impacts that  
37 reduce the performance of the highway. The City notes that WSDOT considers exceeding  
38 LOS D to be an operational deficiency and will work with WSDOT as it addresses LOS  
39 conditions along SR 522.

40

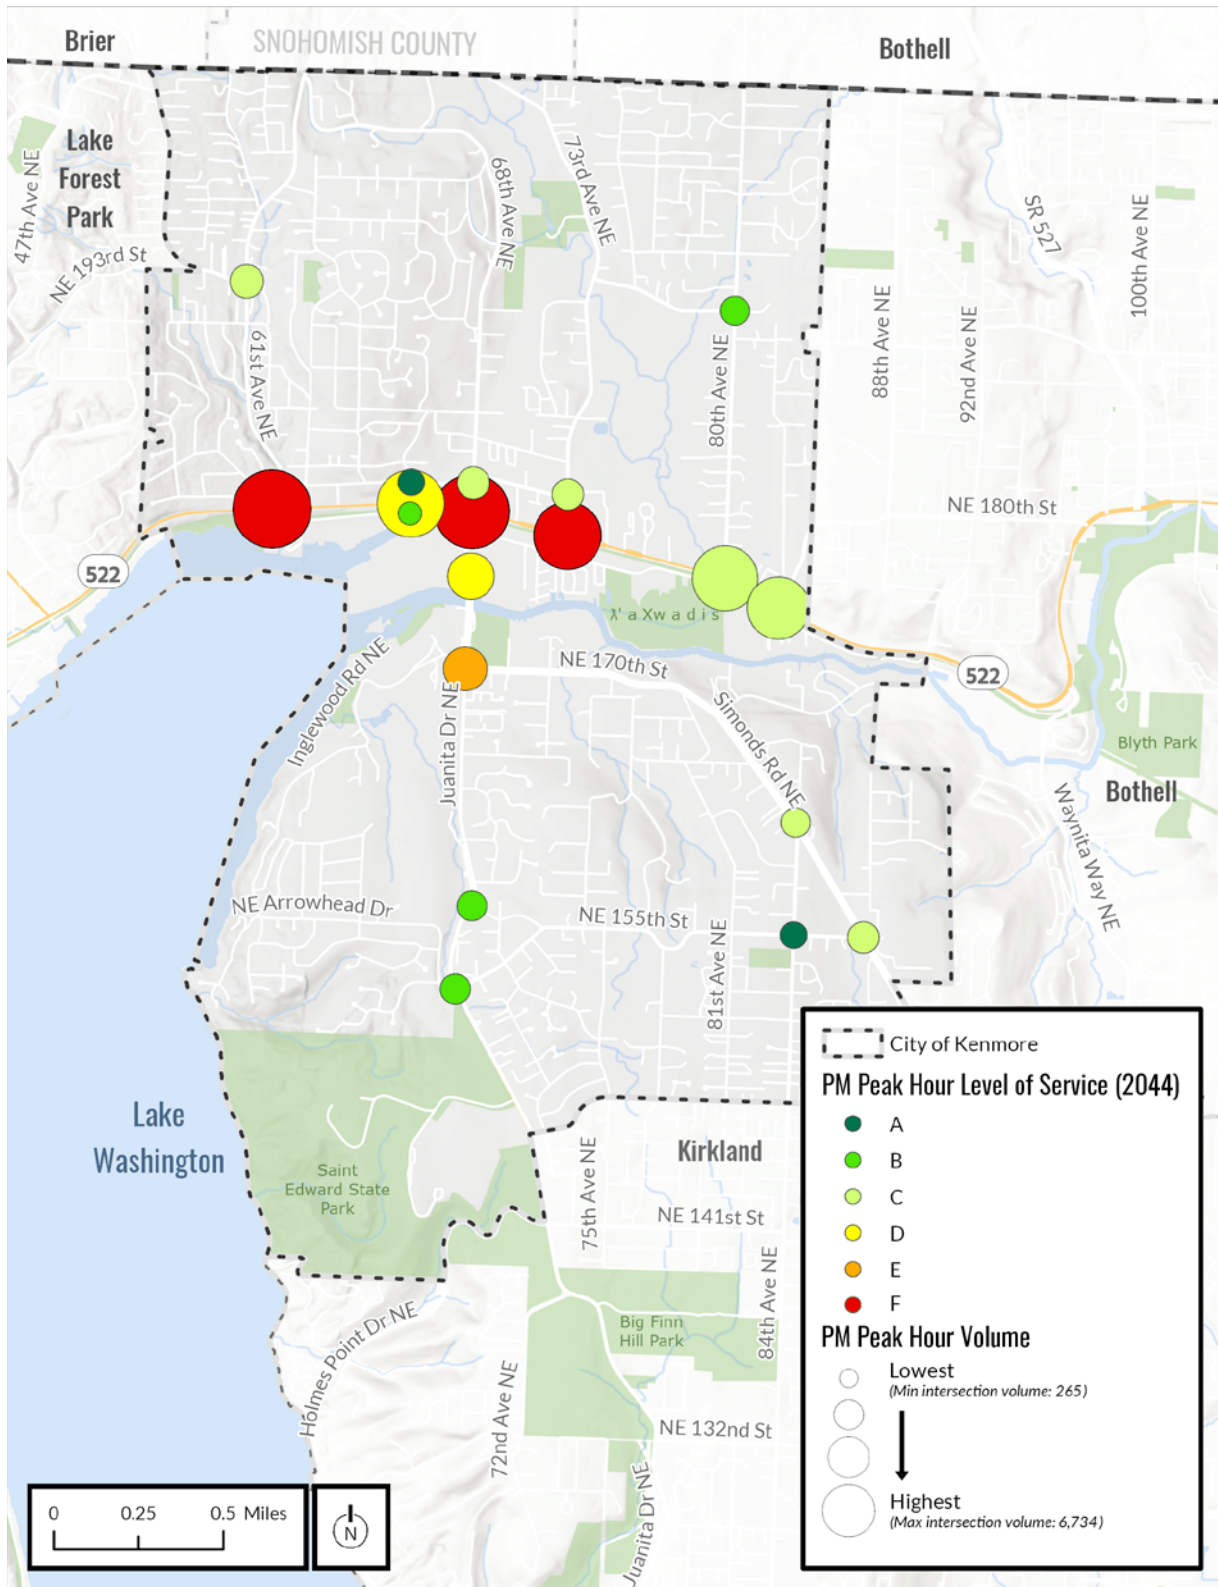

1 **Figure T-10: 2030 Forecasted Auto Level of Service and Volumes**

2

**Parametrix**

2

## 1 **Downtown Parking**

2 The City's on-street parking supply is currently available on a first-come, first-served  
3 basis, with time restrictions. Anticipated development in the Downtown quadrants may  
4 necessitate more active parking management in the future as demand for parking  
5 increases. The City should monitor parking use in downtown and consider the following  
6 actions, as appropriate, to manage demand:

- 7 • If parking spillover is perceived as an issue on nearby residential streets, consider  
8 establishing residential parking zones to maintain curb space for neighborhood  
9 residents.
- 10 • As downtown develops, review the City's parking code to ensure it is aligned with  
11 an urban setting.
- 12 • Consider encouraging more shared parking by developing a public parking facility  
13 that promotes a "park once" concept in the downtown.
- 14 • Consider installation of nonmotorized facilities to help balance demand.
- 15 • Develop structured parking standards to encourage the design of facilities that  
16 can adapt over time as parking demand changes.

17  
18 There are 693 designated park and ride spaces in Kenmore of which 603 spaces are  
19 provided in the Kenmore Park and Ride at 73rd Avenue NE. The remainder of spaces in  
20 the City are distributed in two church parking lots. The spaces are reserved for transit  
21 users who then access Metro and Sound Transit bus service. During weekdays in 2019,  
22 total utilization at these facilities were typically filled to 90 percent capacity, with the  
23 Kenmore Park and Ride being filled to 100 percent capacity. This results in overflow  
24 parking on adjoining streets and properties in the downtown area, thereby reducing the  
25 availability of downtown parking. Planned expansion to park and ride capacity may not  
26 occur until 2034 and the City will need to continue working with Metro and Sound Transit  
27 to identify opportunities to address park and ride demand for high capacity transit areas.  
28

## 29 30 **NEAR TERM AND LONG TERM CAPITAL PROJECTS**

31 This section identifies projects that will support implementation of the City's  
32 transportation vision. Collectively, this program adds up to over \$118 million in  
33 transportation projects to be constructed over the next few decades. Projects are  
34 planned across two time frames. The Six Year (near term) list represents years 0 to 6  
35 (2024-2030) and is financially constrained to only those projects that could realistically  
36 receive funding over the next six years<sup>1</sup>. The Twenty Year (long term) list reaches out to

---

<sup>1</sup> It should be noted that it is unlikely that all of the projects on the 6-year list would receive funding. However, at this time, it is uncertain which ones will move forward in the near term and which will not. All of these projects are high priority projects that the City would move forward with if funds are available.

1 the 20 year time horizon (through 2044) and includes unfunded projects that may stretch  
2 beyond this time period. Detailed cost estimates are provided in Appendix D-4.

3  
4 **Table T-10** describes the Six and Twenty Year Project Lists and **Figure T-23** displays the  
5 locations of these projects around the City. These projects represent a balance of safety,  
6 maintenance, and operational improvements for all modes, with a focus on those that  
7 provide the most benefit to Kenmore residents and leverage outside funds to the greatest  
8 extent possible. The full set of projects would help complete the layered network and  
9 realize the City's transportation vision. The Pedestrian Facilities Plan and ADA Transition  
10 Plan will inform the sequence of projects for the Sidewalk Program and ADA Transition  
11 Plan Program, respectively, undertaken in both the six and twenty year time horizons. No  
12 projects are identified to maintain LOS, as all streets are forecast to operate within the  
13 City's adopted LOS standards.

14  
15 Projects included on the Six Year Project List are considered community priorities that  
16 the City would move forward in the near term should funds become available. These  
17 projects provide a starting point for the City in developing its financially constrained Six  
18 Year CIP, which is updated every two years, and the annually updated 6-year  
19 Transportation Improvement Plan, and are developed based on more updated knowledge  
20 related to project feasibility and funding availability.

21  
22 The Twenty Year Project List also represents important projects, but these projects tend  
23 not to have identified funding. While the scope of the 20-year project list exceeds  
24 revenues from exclusively city sources over the next few decades, it has been sized to fit  
25 within reasonable assumptions for grants and other outside funding sources.

26  
27 The expected City contribution noted in Table T-10 includes anticipated grant funds. It is  
28 recognized that the availability of outside funds is not always predictable. As a result, the  
29 projects included in the Six and Twenty Year Project Lists could be advanced should  
30 funding become available.

1 **Table T-10. Six- and Twenty-Year Project List**

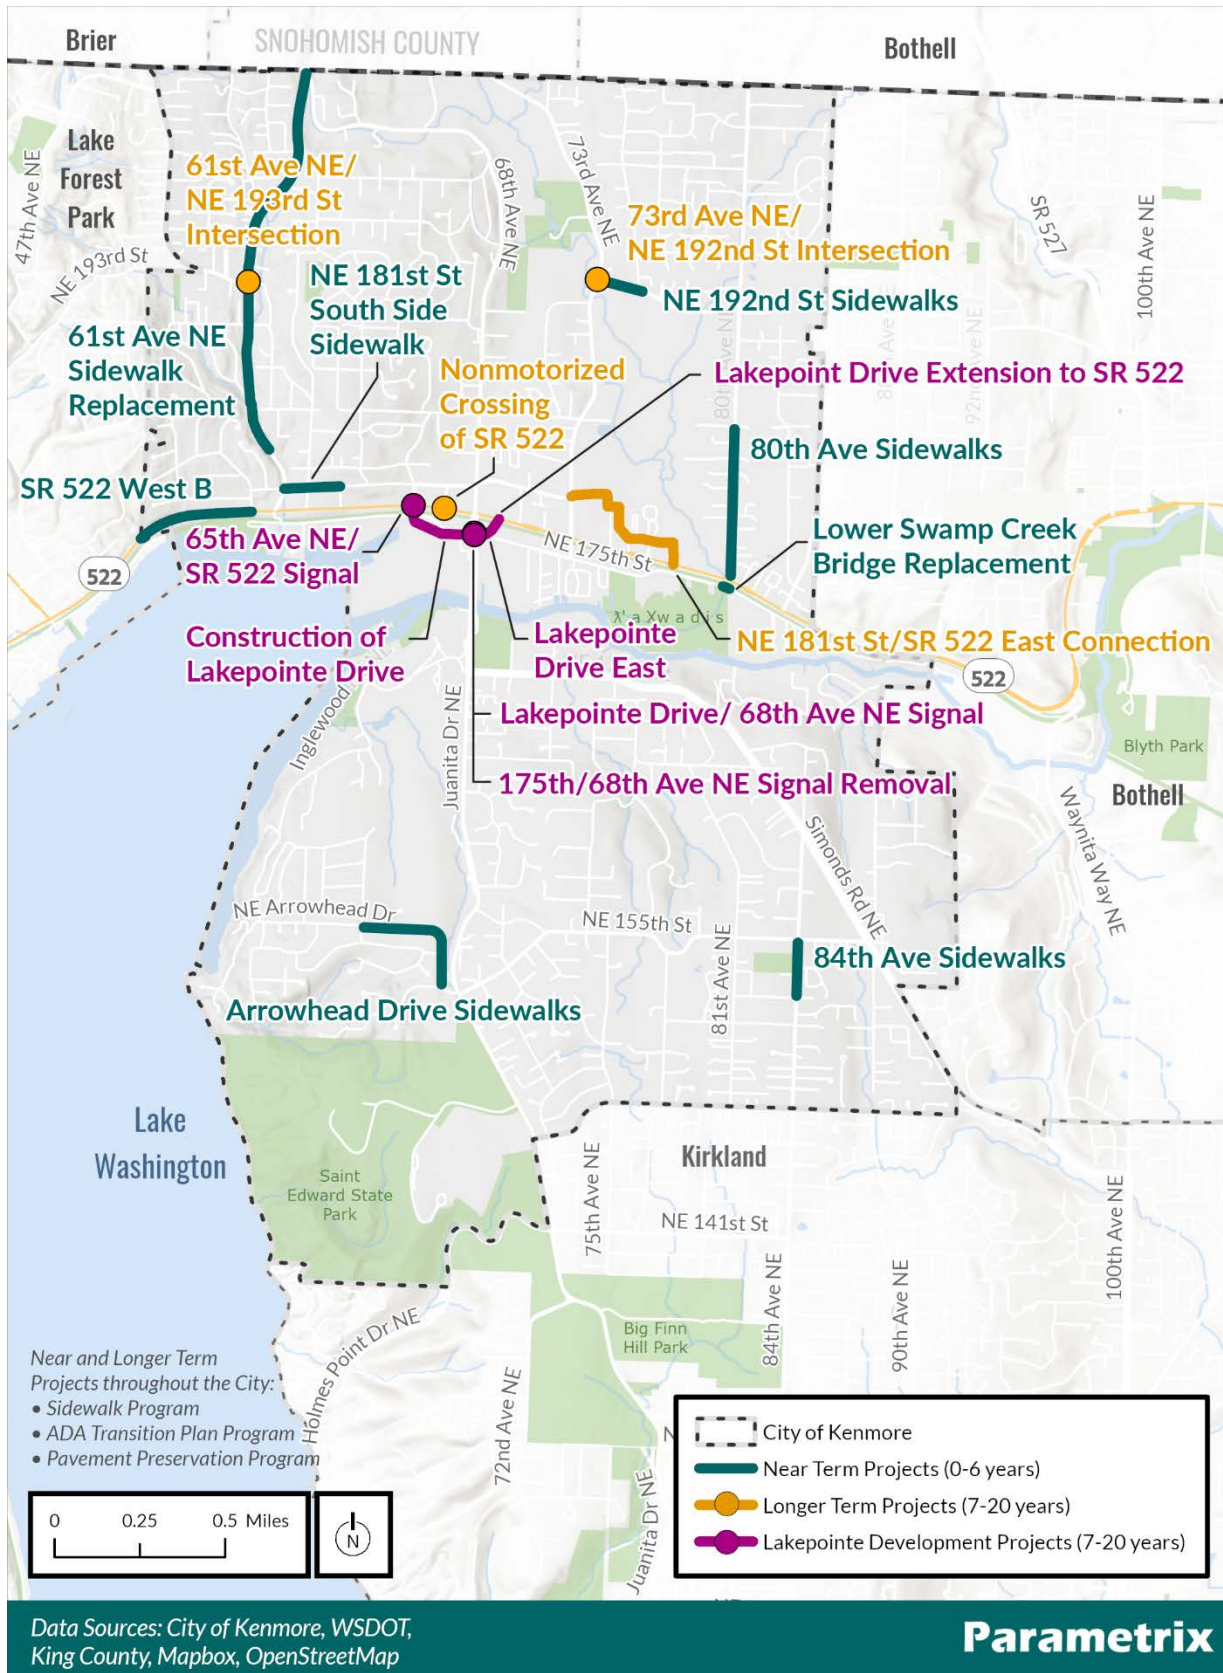

Projects	Benefit to Kenmore	Primary Benefit	Total Cost	Expected City Contribution	Goal Met
<b><i>Near Term (0-6 year) Projects</i></b>					
<b>SR 522 West B (West boundary to 61st Ave NE)</b>	Improve pedestrian and bicycle accessibility, improve safety	Regional, Local	\$2,200,000	\$200,000	1, 3, 4, 7, 8
<b>NE 181st St South Side (61st Ave NE-63rd Ave NE) Sidewalk</b>	Improve pedestrian safety and encourage walking	Local	\$1,300,000	\$200,000	1, 3, 4, 7, 8
<b>61st Ave NE Sidewalk Replacement (NE 181st St-62nd Ave NE)</b>	Improve pedestrian safety, add accommodation for bicycles, enhance stream environment	Local	\$5,110,000	\$247,000	1, 3, 4, 7, 8
<b>80th Ave NE Sidewalks (SR 522-NE 185th St)</b>	Improve pedestrian and bicycle accessibility, improve safety	Local	\$2,470,000	\$247,000	1, 3, 4, 7, 8
<b>NE 192nd St Sidewalks (73rd Ave NE - 75th Ave NE)</b>	Improve pedestrian accessibility, improve safety	Local	\$800,000	\$39,000	1, 3, 4, 7, 8
<b>Arrowhead Drive Sidewalks (NE 151st St - 64th Ave NE)</b>	Improve pedestrian accessibility, improve safety	Local	\$2,220,000	\$222,000	1, 3, 4, 7, 8
<b>84th Ave NE Sidewalks (NE 150th St - NE 155th St)</b>	Improve pedestrian and bicycle accessibility, improve safety	Local	\$2,370,000	\$237,000	1, 3, 4, 7, 8
<b>Lower Swamp Creek Bridge Replacement</b>	Safely accommodate all uses by replacing aging bridge, maintain public access to residents.	Local	\$4,100,000	\$50,000	2, 6, 8
<b>Pavement Preservation Program</b>	Maintain the city's investment in roads and the safety for users	Local	\$5,360,000	\$5,360,000	2, 6, 8
<b>ADA Transition Plan Program</b>	Improve pedestrian safety, access, and accommodation for all users	Local	\$2,750,000	\$2,750,000	1, 3, 4, 7, 8

Projects	Benefit to Kenmore	Primary Benefit	Total Cost	Expected City Contribution	Goal Met
<b>Pedestrian Facilities Plan Program (Sidewalk Program)</b>	Improve pedestrian circulation, accessibility, safety, and encourage walking.	Local	\$4,000,000	\$1,000,000	1, 3, 4, 7, 8
<b>Total</b>			<b>\$32,680,000</b>	<b>\$10,552,000</b>	
<b>Longer Term (7-20 year) Projects</b>					
<b>Pedestrian Facilities Plan Program (Sidewalk Program)</b>	Improve pedestrian circulation, accessibility, safety, and encourage walking.	Local	\$31,000,000	\$19,000,000	1, 3, 4, 7, 8
<b>ADA Transition Plan Program</b>	Improve pedestrian safety, access, and accommodation for all users	Local	\$8,750,000	\$8,750,000	1, 3, 4, 7, 8
<b>Pavement Preservation Program</b>	Maintain the city's investment in roads and the safety for users	Local	\$12,000,000	\$12,000,000	2, 6, 8
<b>Lakepointe Development Mitigation</b>	<p>Intersection, pedestrian, bicycle, and access improvements to accommodate increased volumes related to the Lakepointe development. Improvements include:</p> <ul style="list-style-type: none"> <li>• Construction of a new road (Lakepointe Drive) from 65th Avenue/SR522 to 68th Avenue NE</li> <li>• Extending Lakepointe Drive east of 68th Avenue NE</li> <li>• Construction of the new Lakepointe Drive/68th Avenue intersection, including a new traffic signal</li> <li>• Elimination of the signal at 175th Street/68th Avenue</li> <li>• Installation of a signalized full-access intersection at 65th Avenue/SR 522</li> </ul>	Local	To be determined	\$0	1, 2, 3, 4, 7, 8

Projects	Benefit to Kenmore	Primary Benefit	Total Cost	Expected City Contribution	Goal Met
<b>61st Ave NE/NE 193<sup>rd</sup> St Intersection</b>	Intersection treatment to improve safety and vehicle operations	Local	\$2,200,000	\$220,000	1, 2, 4, 6, 7
<b>73rd Ave NE/NE 192nd St Intersection</b>	Intersection treatment to improve safety and vehicle operations	Local	\$3,700,000	\$740,000	1, 2, 4, 6, 7
<b>Nonmotorized crossing of SR 522</b>	Improved nonmotorized access across SR 522 in the vicinity of 67 <sup>th</sup> Avenue NE	Local	\$17,160,000	\$3,430,000	1, 2, 4, 6, 7
<b>NE 181st Street/SR 522 East Connection</b>	Improved local access between future developments near the Kenmore Park & Ride, SR 522, and downtown Kenmore	Local	\$14,000,000	\$2,800,000	1, 2, 4, 7
<b>Total</b>			<b>\$88,810,000</b>	<b>\$46,940,000</b>	

1

1 **Figure T-23: Six- and Twenty-Year Transportation Improvement Projects**

2  
3 **Non-City Projects**

## 1 **State Facilities**

2 There are projects outside of Kenmore’s purview that will also affect travel in and around  
3 the City. WSDOT oversees planning and operations of SR 522, a Highway of Statewide  
4 Significance and Kenmore’s major east-west corridor. The City coordinates with WSDOT  
5 and provides input on potential roadway projects on SR 522, but the State ultimately has  
6 control of this corridor.

7  
8 Another State-controlled project affecting travel in Kenmore is the tolling of the SR 520  
9 Bridge across Lake Washington. Future increases in this toll, or potential tolling of I-90,  
10 may cause additional drivers to divert along Lake Washington, adding volume to  
11 Kenmore’s already busy 68th Avenue / Juanita Drive and SR 522 corridors. The City will  
12 continue to monitor congestion changes along these corridors and work with the State  
13 to identify potential solutions.

## 14 **Downtown Development South of SR 522**

15  
16 The southern two downtown quadrants between SR 522 and the Sammamish River  
17 (including the Lakepointe properties, Glacier/Cal Portland properties and properties  
18 within the Plywood Supply Special Study Area) have long been envisioned as sites for  
19 future master planned urban mixed-use development. These properties are subject to  
20 additional development regulations called P-Suffix regulations. P-Suffix regulations are  
21 property specific and include requirements for transportation infrastructure  
22 improvements that would need to be in place to accommodate full development.

23  
24 Transportation infrastructure improvements described within the P-Suffix regulations  
25 include:

- 26 • Construction of a new road (Lakepointe Drive) from 65th Avenue/SR522 to 68th  
27 Avenue NE
- 28 • Extending Lakepointe Drive east of 68th Avenue NE
- 29 • Construction of the new Lakepointe Drive/68th Avenue intersection, including a  
30 new traffic signal.
- 31 • Elimination of the signal at 175th Street/68th Avenue.
- 32 • Installation of a signalized full-access intersection at 65th Avenue/SR 522.
- 33 • Construction of a pedestrian overcrossing of SR 522.

34 The approved Master Plan for the southern two downtown quadrants was originally  
35 approved in 1998 and did not account for many of the existing and planned transportation  
36 investments that currently and will influence travel to, from, and within Kenmore. For  
37 example, Sound Transit’s Stride BRT service was not a consideration when assessing the  
38 impacts of these developments. Additional traffic modelling would be required in  
39 accordance with future planned development for these sites. Modifications to the  
40 transportation infrastructure improvements described within the P-Suffix regulations

1 and/or new projects or additional improvements, including revised SR522 connection  
2 points, may be necessary.

3 The City assumes that the Lakepointe property will redevelop within the next 20 years,  
4 accompanied by construction of the required transportation improvements. All of the  
5 required improvements are expected to be fully funded by the developer(s) of the  
6 Lakepointe properties, with the exception of the SR 522 pedestrian crossing. The City  
7 anticipates contributing to the cost of this improvement, which may include securing  
8 grant funding. Should the redevelopment not be fully realized in the 20-year horizon, the  
9 associated transportation improvements would not be implemented in that time frame.

10  
11  
12

## 1 IMPLEMENTATION STRATEGIES

2 The Transportation policies would require new, continuing, or increased commitments of  
3 City resources to implement projects and programs, create educational or incentive  
4 programs, or coordinate with adjacent jurisdictions. Implementing the Transportation  
5 Element will require close coordination among the City departments, citizens, businesses,  
6 and other agencies within the region.

7  
8 In order to guide the City's implementation of the transportation element, project priorities  
9 should be assigned to assist in assembling an updated six-year CIP, working toward the  
10 2044 planning horizon. This section summarizes the recommended future projects and  
11 documents the criteria used to prioritize them.

12  
13 The Transportation Element is a living document and serves as the blueprint for  
14 transportation in Kenmore over the next several years. Several implementation steps  
15 should be initiated over the next couple of years to determine if changes are needed, or  
16 to reaffirm a particular strategy.

### 17 Overview of Costs and Revenues

18  
19 A key GMA planning requirement is the concept of fiscal restraint in transportation  
20 planning. A fiscally constrained Transportation Element must first allow for operation and  
21 maintenance of existing facilities, and then capital improvements. To introduce fiscal  
22 constraint into the Transportation Element, an inventory of revenues and costs was  
23 undertaken to identify funds that are likely to be available for capital construction and  
24 operations.

25  
26 The proposed Transportation Element for the City of Kenmore contains a variety of  
27 projects that will likely cost the city approximately \$118.5 million over 20 years. **Table T-**  
28 **11** summarizes the costs of the major types of transportation improvements. The  
29 Transportation Element focuses on capital projects that will complete the layered  
30 network plan. The Transportation Element also includes ongoing pavement maintenance  
31 to ensure that the roadway network is kept in good condition.

32  
33

1 **Table T-11. Costs of Kenmore Transportation Element (20 years)**

Project Needs	Description	Estimated Costs			Expected City Cost
		2024-2030	2030-2044	Total	
Auto/Truck Priority Projects	Bridges, traffic signals, intersection channelization, SR 522 improvements	\$6,300,000	\$19,900,000	\$26,200,000	\$3,810,000
Pedestrian Projects	Sidewalks, crossings	\$21,020,000	\$39,750,000	\$60,770,000	\$32,692,000
Multimodal Projects	Multimodal corridors, SR 522 crossings	\$0	\$17,160,000	\$17,160,000	\$3,430,000
Pavement Maintenance	Overlay and pavement repair	\$5,360,000	\$12,000,000	\$17,360,000	\$17,360,000
<b>Total</b>				<b>\$121,490,000</b>	<b>\$57,492,000</b>

2 \*Costs denoted in millions; 2022 dollars used (no escalation)

3  
4 Revenues for transportation capital and operations include those from outside sources  
5 and grants, general city funds, real estate excise taxes, impact fees, photo enforcement  
6 fees, and gas tax receipts. If the city were able to maintain this level of revenue, the City  
7 could afford between \$80-\$100 million in transportation projects over the next 20 years.  
8 Other potential revenue sources include:

- 9 • Proceeds from General Obligation Bonds
- 10 • Creation of LIDs
- 11 • Reciprocal impact fees with adjacent jurisdictions
- 12 • Business license fee per employee

13  
14 **Table T-12** identifies the anticipated funding sources for transportation projects in the  
15 City through 2044.

1 **Table T-12. Costs of Kenmore Anticipated Transportation Funding Sources (20 years)**

<i>Funding Sources</i>	<i>Estimated Funding Level</i>		
	<i>2024-2030</i>	<i>2030-2044</i>	<i>Total</i>
Local (City), including Transportation Impact Fees	\$12,552,000	\$46,940,000	\$57,492,000
Other Agencies/Jurisdictions (State and Local)	\$0	\$0	\$0
Grants (State and Federal)	\$20,128,000	\$41,870,000	\$61,998,000
New Taxes and Fees	\$0	\$0	\$0
<b>Total</b>	<b>\$32,680,000</b>	<b>\$88,810,000</b>	<b>\$121,490,000</b>

2  
3 The comparison of revenues to costs indicates that the city will need to carefully prioritize  
4 its projects, since not all of the transportation needs are likely to be affordable with  
5 existing revenue sources during the 20-year period. If this occurs, the City has several  
6 options:

- 7 • Increase the amount of revenue from existing sources, including impact fees, real  
8 estate excise taxes, transportation benefit district, or increased general fund  
9 revenues.
- 10 • Adopt new sources of revenue.
- 11 • Lower the LOS standard, and therefore reduce the need for some transportation  
12 improvements.

13  
14 The city can explore the feasibility and likely revenue amounts from these or other  
15 sources as the Transportation Element is implemented over the next several years. A  
16 summary of potential project funding sources is included in Appendix D-5.

### 17 **Setting Priorities**

18  
19 Project prioritization is needed to help identify when best to fund and implement the  
20 projects since funding is limited. Criteria were established to help prioritize the projects  
21 and implementation. These unweighted criteria include:

- 22 (1) Meets City's transportation goals
- 23 (2) Maintains/improves safety of traveling in Kenmore
- 24 (3) Provides improved mobility and accessibility within Kenmore
- 25 (4) Leverages non-city (federal, state, private) funds freeing up city revenues for  
26 additional projects  
27

1 (5) Responds to capacity needs using strategies identified in the Comprehensive  
2 Plan.

3  
4 Using these criteria, the identified projects will need to be evaluated and ranked based on  
5 how well each could meet the criteria. Since one of the criteria relates to funding  
6 availability, priorities may shift over time as fund sources change.

7  
8 High priority projects for Kenmore are those that meet multiple criteria in terms of  
9 effectiveness, benefit to the community, and ability to be implemented. These attributes  
10 will allow the City to take advantage of a variety of public and private funding sources to  
11 complete key projects.

12
