

# Rapid Progress+

**Fish Blocking Culverts**

*\*Graphics are not to scale*

- **Fund existing programs** and maintain compliance with regulatory requirements.
- Complete capital projects currently planned including the **Public Works Operations Center**, retrofitting stormwater facilities, and Muck Creek restoration.
- Design costs for replacement of **6** additional high priority fish passage culverts.\*

- Design costs for **Little Swamp Creek Replacement project**, including replacement/removal of **4** culverts.
- Implements actions identified in the **Climate Action Plan** Natural Systems & Water Resources section.
- 50% of the estimated construction costs for the high priority fish passage culvert replacements, leveraging the other 50% of costs with grants.

- Annual funding for open space land acquisition and habitat restoration projects.
- **Guarantees** construction of some projects regardless of grant status.
- Riparian habitat restoration of the **Swamp Creek Channel**.
- Replacement of large fish-blocking culverts on Chet Chatl (0056) Creek adjacent to SR 522.

City of Kenmore SWM Program Monthly Service Charge (Residential)
